Medicago Spain 192239

1970

Contributed germ plasm to variety WL 504. See summary card. 907361

--Report of meeting of National Certified Alfalfa Variety Review Board. 12/8/70.

907362

This is not a valid no. for medicago (it is a Trifolium). However, it was reported this way in the National alfalfa variety review Board report of meeting of December 8, 1970. A subsequent attempt with Beard to obtain the correct number was unfruitful, as he did not reply to my letter of 6/11/71. For documentary purposes, this card will be maintained in the alfalfa file.

— W. H. Skrdla March 28, 1975.

Ref: Ltr from Kawaguchi 6/28/71 (PI corresp file and 1970 meeting of Nat. alfalfa Var. Review Board.) correction was made.
