CR-105 10/28/69 Q537

Medicago ~~falcata~~ sativa Turkey 204458

In tests for resistance to Pythium irregulare, this line showed 85.90 % survival compared with the control, Rhizoma. This line, along with 204457, 204885 and 255178 are among those showing highest resistance but none were more resistant than Rhizoma. Tetraploids showed more tolerance than diploids. This is a tetraploid. - E.L. Sorensen, Kans, Ltr 11/14/62 & 1962 acc perf rep.
