

Resistant to mildew (downy?). R. Melber, California. Info. on Acc. File 1/14/66. **907276**

A genetic male sterile was isolated from the PI (it is not cytoplasmic). This clone was very vigorous, but a poor seed producer. G. A. Page, 1968 Acc. Perf. Rep., Minnesota **907277**

A genetic male sterile was isolated from this PI (it is not cytoplasmic). The clone is very vigorous, but a poor seed producer. However, it produces very vigorous progeny and further evaluation is in progress.

---G. A. Page, Minnesota, 1970 Accession Performance Report. **907278**
