

Some resistance to spotted alfalfa aphid.
---W. F. Lehman, California, 1959 APR.

907725

Probably dormant to semi-dormant.
---W. F. Lehman, California, 1959 APR.

907726

Has intermediate resistance to spotted alfalfa aphid. Showed an injury rating of 5.5 compared with susceptible check, buffalo, of 9.8. Nebraska clone no. 4272 assigned this acc.
---W. R. Kehr, Nebraska, Special Report X-102, 2/8/60.

907727

Individual resistance to stem nematode & bacterial wilt.
---Ref. Dolan's memo to Hoover, 4/25/61, Nevada. 1959 W-6 Tech. Comm. Minutes.

907728

Pea aphid resistant selections made. See summary card.
---G. D. Moore, Minnesota, 1964 APR.

907729

Shows resistance to the spotted alfalfa aphid. See summary card.
---Arnold-Thomas See Service, H. L. Carnahan, Minutes of 1968 Tech. Comm. Meeting, Appendix 9, 67.

907730

Individual plants have resistance to spotted alfalfa aphid. However, they also have undesirable characteristics, so may not be used in immediate parentage of improved alfalfas but should provide the basis for diverse germplasm. See summary card.
---Letter from H. L. Carnahan to B. Crampton, both of California, 9/15/69.
