

105017 to 105034—Continued.

105023. *Oroxylon indicum* (L.) Vent.
Bignoniaceae. East Indian trumpetflower.

A tropical ornamental tree up to 40 feet high, with glossy compound leaves 2 to 4 feet across and terminal panicles of white or purple flowers. The large flat pods, up to 3 feet in length, contain winged seeds. Native to southeastern Asia.

For previous introduction see 88104.

105024. *Pieris* sp. Ericaceae.

105025. *Pinus yunnanensis* Franch.
Pinaceae. Yunnan pine.

A large forest tree, native to Yunnan. The long slender drooping leaves are up to 10 inches long, and the cones, 2 to 4 inches long, have flat scales.

For previous introduction see 100586.

105026. *Pinus* sp. Pinaceae.

105027. *Pittosporum glabratum* Lindl.
Pittosporaceae.

A tree, native to central China, with evergreen foliage and orange fruits.

For previous introduction see 99196.

105028. *Polygala wattersi* Hance.
Polygalaceae.

A herbaceous perennial from central China with woody stems, membranous elliptic-lanceolate leaves over 2 inches long, and small yellow flowers in lax terminal racemes.

105029. *Porana racemosa* Roxb. Convolvulaceae. Snow creeper.

A vine, native to the Himalayan region of India. It occurs in dense masses,

105017 to 105034—Continued.

climbing over other plants in the jungle. The dazzling-white flowers resemble patches of snow.

For previous introduction see 61618.

105030. *Psychotria* sp. Rubiaceae.

For previous introduction see 104116.

105031. *Schima argentea* Pritz. Theaceae.

An evergreen tree native to southwestern China.

For previous introduction see 99220.

105032. *Tripterygium forrestii* Loesner.
Celastraceae.

A shrub about 3 feet high, with oval crenulate-serrate papery leaves 2 to 3 inches long, and terminal panicles of small green-brown flowers. Native to open situations on the Tali Range, Yunnan.

For previous introduction see 100610.

105033. *Wistaria* sp. Fabaceae.

105034. (Undetermined.)

Received as *Malotus* sp., but the seeds are not of that genus.

105035. *Avena bromoides* Gouan. Poaceae.

From France. Seeds presented by R. Salgues, Director, Botanic Garden, Brignoles. Received March 20, 1934.

A slow-growing perennial grass up to 2 feet high, with thick, very tough, rough-hairy leaves. It is confined almost entirely to the Mediterranean countries.

For previous introduction see 89816.
