

109839 to 109875—Continued.

109866. No. 2963. *Arvejas verdes*.
 109867. RUPRECHTIA CORIACEA (Karst.) Blake. Polygonaceae.
 No. 3015. *Biscochito*. From near El Sombrero, State of Guarico, February 3, 1935. A small tree, 20 feet high, native to Venezuela, with ovate-lanceolate, acute leaves about 3 inches long.
 109868. RUPRECHTIA sp. Polygonaceae.
 No. 3030. Collected between El Sombrero and La Democracia, State of Guarico, February 4, 1935. A small tree.
 109869. SAPINDUS SAPONARIA L. Sapindaceae. Southern soapberry.
 No. 3031. *Para Para, pepo*. Collected between El Sombrero and La Democracia, State of Guarico, February 4, 1935.
 For previous introduction see 51410.
 109870. SCHOENOCALON OFFICINALE (Schlecht.) A. Gray. Melanthiaceae.
 No. 2994. *Cebadilla*. From Antimano, near Caracas, January 28, 1935. A bulbous plant, native to tropical America, about 3 feet high, with long linear, grass-like leaves and small white flowers on a long spike.
 For previous introduction see 45810.
 109871. SERJANIA GLABRATA H. B. K. Sapindaceae.
 No. 2954. From the lower Catuche Woods, near Caracas, January 22, 1935. A climbing shrub with alternate biternate leaves and white flowers in axillary spike-like racemes. Native to temperate regions in Peru.
 For previous introduction see 101251.
 109872. SICANA ODORIFERA (Vell.) Naud. Cucurbitaceae. Casabanana.
 No. 2975. *Cajúa*. From the market at Caracas, January 23, 1935. A subtropical ornamental vine with cylindrical fruits over a foot long, which have finely mottled dark reddish rinds and yellow flesh with a pleasing odor somewhat like that of the muskmelon. The fruit is used for preserves or dulces.
 For previous introduction see 98882.
 109873 to 109875. VIGNA spp. Fabaceae.
 From the market at Caracas, January 23, 1935.
 109873 and 109874. VIGNA CYLINDRICA (Stickm.) Skeels. Catjang.
 109873. No. 2958. *Frijol blanco de sopa*.
 109874. No. 2965. *Frijoles negros*.
 109875. VIGNA SINENSIS (Torner) Savi. Cowpea.
 No. 2960. *Frijol caia de santo*.
 109876 to 109878. FESTUCA spp. Poaceae. Fescue.
 From Germany. Seeds presented by Gustav Zülzer, Hamburg. Received March 5, 1935.
 Introduced for Department specialists.
 109876. FESTUCA CAPILLATA Lam. Hair fescue.
Sapi.
 For previous introduction see 109211.

109876 to 109878—Continued.

- 109877 and 109878. FESTUCA OVINA L. Sheep fescue.
 For previous introduction see 109497.
 109877. *Sano*. 109878. *Saru*.
 109879 to 109883.
 From Cuba. Seeds presented by Robert M. Grey, Superintendent, Atkins Institution of the Arnold Arboretum, Soledad, Cienfuegos, through F. G. Walsingham. Received February 28, 1935.
 109879. CASSIA BACILLARIS L. f. Caesalpinaceae.
 A small tree of rather straggly habit with pinnate foliage and golden-yellow flowers in loose racemes.
 For previous introduction see 106514.
 109880. CASSIA EXCELSA Schrad. Caesalpinaceae.
 Received under the varietal name "angustifolia," for which a place of publication has not been found.
 109881. ENTADA GIGAS (L.) Fawcett and Rendle. Mimosaceae.
 A woody climber with stems often 100 feet long, bipinnate leaves about 6 inches long, and small racemes of yellow or white flowers. The fruit is a large, flat, jointed pod 3 to 7 feet long, with one seed to a joint. The handsome deep-brown seeds are 2 inches across. Native to the West Indies.
 109882. IPOMOEA SINUATA Ortega. Convolvulaceae.
 A handsome vine with attractive palmately-divided leaves and bell-shaped flowers 1 to 2 inches wide, white with a purple center. Native to Mexico.
 For previous introduction see 26411.
 109883. TECTONA GRANDIS L. f. Verbenaceae. Teak.
 A tall evergreen tree, native to southern and central Asia, with opposite ovate leaves and white or bluish flowers in terminal panicles 6 inches long. The wood is highly prized by shipbuilders because of its great strength and durability.
 For previous introduction see 94201.
 109884. ALOE sp. Liliaceae.
 From Venezuela. Plants collected by W. A. Archer, Bureau of Plant Industry. Received March 12, 1935.
 No. 3072. *Zabila*. Collected February 16, 1935, near the sea on a dry hillside, on the road between Caracas and Cabo Blanco. A stemless aloe about a foot high with dull yellow flowers.
 109885 to 109888.
 From China. Seeds and bulbs presented by Andrew Tse, Hong Kong. Received March 7, 1935.
 A collection of Chinese vegetables introduced for Department specialists.
 109885. ALLIUM CEPA L. Liliaceae. Onion.
 109886. ALLIUM SATIVUM L. Liliaceae. Garlic.
 Bulbs.
 109887. APIUM GRAVEOLENS L. Apiaceae. Celery.
