

19390 to 19419—Continued.

19404. *ALBIZZIA JULIBRISSIN*.

From Tang-san. "(No. 131a, Oct. 25, 1905.) A small-sized ornamental tree with very finely divided pinnate leaves; bears pinkish blossoms." (*Meyer.*)

19405. *CRATAEGUS PINNATIFIDA*.

Hawthorn.

From Tientsin. "(No. 147a, Nov. 22, 1905.) A large-fruited variety used for making very fine preserves. The trees are decidedly ornamental and highly deserve to be planted in parks in groups or as solitary specimens. See also No. 52a (S. P. I. No. 17882)." (*Meyer.*)

19406. *PROSOPIS* sp. ?

Mesquite bean.

From Honolulu, Hawaii. "(No. 150a, Sept. 9, 1905.) A shrub which supplies in its pods an excellent cattle food. Its wood is fine firewood, and when used for fence posts will last a long time. Grows on sandy or on dry wastes where nothing else will grow." (*Meyer.*)

19407. *RHAMNUS* sp.

Buckthorn.

From Shan-hai-kwan. "(No. 175a, Dec. 1, 1905.) A small *Rhamnus* growing from 3 to 5 feet high; has small leaves which turn to bronze hues in the fall. Might be of use as a small hedge plant, as the stems grow close together and are well furnished with spines." (*Meyer.*)

19408. *CINNAMOMUM CAMPHORA*.

Camphor tree.

From Tang-hsi, near Hanchau, Chehkiang. "(No. 220a, Feb. 28, 1906.) Seeds of some fine old camphor trees growing wild and also cultivated." (*Meyer.*)

19409. *QUERCUS* sp.

Oak.

From Hanchau. "(No. 222a, Mar. 3, 1906.) A few acorns of a tall, deciduous oak used for building purposes." (*Meyer.*)

19410. *RHUS* sp.

Sumac.

From Hanchau. "(No. 223a, Mar. 4, 1906.) Seeds of a sumac growing wild in the woods. Grows to a medium-sized tree when left alone, but on account of being chopped off is usually found as a bush." (*Meyer.*)

19411. *ACER* sp.

From near Hanchau. "(No. 225a, Mar. 6, 1906.) A very tall growing maple well adapted for use as an avenue tree." (*Meyer.*)

19412. (Undetermined.)

From Tang-hu. "(No. 226a, Mar. 1, 1906.) A vine growing along a hedge; may be an ornamental." (*Meyer.*)

19413. *LONICERA JAPONICA*.

Honeysuckle.

From Tang-hsi. "(No. 227a, Feb. 28, 1906.) A large-leaved variety." (*Meyer.*)

19414. *CAESALPINIA* sp. (?).

From Tang-hsi, near Hanchau. "(No. 229a, Mar. 1, 1906.) A very tough timber-producing tree used for making ax and spade handles. Seems to be a *Caesalpinia* or something closely related." (*Meyer.*)

19415. (Undetermined.)

From Tang-hsi. "(No. 230a, Mar. 1, 1906.) A bush which may prove to be ornamental; often becomes a small tree. Cuttings sent under No. 147 (S. P. I. No. 18471)." (*Meyer.*)
