

19737 to 19775—Continued.

19742.

Variety No. 3, apparently a red \times black-hulled kafir cross; head about 13 inches long; grains tinged with red.

19743.

Same as No. 19742, but with grains somewhat redder in color; hulls less dark; length 11 inches.

19744.

Bhampi. Apparently red \times black-hulled kafir; seeds rather large, tinged with red; hulls light to dark; head rather club shaped; length 11 inches.

19745.

Variety No. 4; similar to No. 19744, except that the seeds are slightly less red; hulls perhaps a little shorter; length about 11 inches.

19746.

Usutuazana. Black-hulled kafir type; the character of the hulls and seeds indicates a probable cross with orange on red or white kafir; length about 11 inches.

19747.

Gabanc. Resembles a cross of orange with either red or black hulled kafir; seeds tinged with red, with red to dark colored hulls; length 11 inches.

19748.

Same as No. 19747, but with more of a kafir-like appearance; seeds rather large, partially inclosed by hulls longer than kafir hulls; head 11 inches long.

19749.

Jara. A good type of red kafir; seeds rather large; length about 13 inches.

19750.

Unkloblonde (long headed). Red kafir type, with light colored hulls; seeds rather large; length 10 inches.

19751.

Same as No. 19750, but with rather large, dark hulls; length 10 inches.

19752.

Ugabana. Red kafir type, with rather large red-colored seeds, partially inclosed with very dark red colored hulls; length about 10 inches.

19753.

Same as No. 19752, but with lighter colored seeds inclosed by dark, shiny hulls; head somewhat club shaped; length about 10 inches.

19754.

Gabana. Red kafir type, with red hulls ranging to light color; seeds reddish; head very slender; length 9 inches.

19755.

Mbedhlana. Red kafir type, with large, dark red colored seeds, partially inclosed by large, dark, shiny hulls; head slender; length 9 inches.
