

20001 to 20229—Continued.

- 20071. PRUNUS ARMENIACA. Apricot.**
From near Tchang-song, northern Korea. "(No. 339a, July 21, 1906.) Wild apricot seeds from a very tall tree, which was about 40 feet high and of which the trunk measured 10 feet in circumference a few feet above the soil. Can be used as a shade tree in parks. Fruits small and worthless." (*Meyer.*)
- 20072. PRUNUS ARMENIACA. Apricot.**
From Liaoyang, Manchuria. "(No. 340a, June 21, 1906.) A red apricot grown in the gardens of Liaoyang, all the trees being seedlings; fruit medium sized and of very sweet flavor." (*Meyer.*)
- 20073. PRUNUS sp. Plum.**
From the mountains of northern Korea. "(No. 341a, Aug., 1906.) A very bushy wild plum growing along creeks and moist places. The fruits are medium sized and very sour. May be used as a stock plant or for hybridization." (*Meyer.*)
- 20074. PRUNUS sp. Plum.**
From Antung, Manchuria. "(No. 342a, July 10, 1906.) A very large yellow plum obtained in Antung, but said to come from Chefoo." (*Meyer.*)
- 20075. PRUNUS sp. Cherry.**
From Fong-whan-cheng, Manchuria. "(No. 343a, July 1, 1906.) This edible bush cherry is a very ornamental shrub when in full fruit. The fruits make fine preserves." (*Meyer.*)
- 20076. PRUNUS sp.**
From Sha-ho, Manchuria. "(No. 344a, June 26, 1906.) A shrubby *Prunus* growing in a rocky ravine; perhaps an ornamental hardy bush." (*Meyer.*)
- 20077. PRUNUS sp. Chokeycherry.**
From the mountains of northern Korea. "(No. 345a, Aug. 11, 1906.) A large-leaved chokeycherry bearing large racemes of cherries in profusion. Grows to be a small tree or a large shrub. In the fall the leaves assume very brilliant hues. May be of use as an ornamental park plant." (*Meyer.*)
- 20078. PRUNUS sp. Chokeycherry.**
From the mountains of northern Korea. "(No. 346a, Aug., 1906.) Seed collected in different places. In all probability different strains will appear from this seed, for some bushes showed marked small differences in comparison with others." (*Meyer.*)
- 20079. PRUNUS sp. Chokeycherry.**
From the mountains of northern Korea. "(No. 347a, Aug. 6, 1906.) A very ornamental chokeycherry with large, ovate, lanceolate leaves. Can be used as a small ornamental tree in parks." (*Meyer.*)
- 20080. PRUNUS GLANDULIFOLIA. Chokeycherry.**
From the mountains of northern Korea. "(No. 348a, Aug. 9, 1906.) A small-leaved, ornamental chokeycherry. May be useful in parks and in gardens. The straight young stems may be useful for making smoking-pipe stems, and the heavier pieces of the trunk produce fine wood for small furniture." (*Meyer.*)
- 20081. PRUNUS sp. Chokeycherry.**
From the mountains of northern Korea. "(No. 349a, Aug. 21, 1906.) A small-leaved chokeycherry with slender, drooping branches. An ornamental small tree for parks and gardens." (*Meyer.*)
