

20521 to 20795—Continued.

- 20588. HORDEUM VULGARE.** **Barley.**
 From Nerli, Hatfjelddalen district, Norway. "(No. 68.) Spring barley grown at Nerli on very sandy soil; latitude 65° 32'. The harvest often fails in this locality." (*Hansen.*)
- 20589. AVENA SATIVA.** **Oat.**
 From Vefsen district, latitude 65° 30', Norway. (No. 69.) Spring oats.
- 20590. FESTUCA ELATIOR.** **Tall fescue.**
 From Mjoes, Vardahl, Christiania province, Norway. "(No. 70.) Wild seed selected by Director Nielsen, of the experiment station at Bodoë; latitude 67°." (*Hansen.*)
- 20591. PISUM ARVENSE.** **Field pea.**
 From Bodoë, Norway. "(No. 71.) *Sveding.* A field pea originally introduced from Denmark by Mr. Sebastian Larson, of Aas, Norway; grown for the past twelve years in Norway—the last two at the Bodoë Experiment Station. Does well on sandy soil at Bodoë and ripens in 120 days." (*Hansen.*)
- 20592. HORDEUM VULGARE.** **Barley.**
 From Bodoë, Norway. "(No. 72.) Spring barley from the experiment station at Bodoë; latitude 67°." (*Hansen.*)
- 20593. PHLEUM PRATENSE.** **Timothy.**
 From Christiania, Norway. "(No. 73.) Native timothy, No. 469, from A. Michelet, seedsman. The claim in Norway is that the native is hardier than that introduced." (*Hansen.*)
- 20594. BRASSICA RAPA.** **Turnip.**
 From Mjelde, near Tromsø, Norway. "(No. 74.) Mjelde is near 70° N. lat. Turnips are found very useful for stock feeding north of the Arctic Circle in Lapland." (*Hansen.*)
- 20595. LOLIUM PERENNE.** **Perennial rye-grass.**
 From Aas, Norway. "(No. 75.) Native name *Yædersk Raigrass.* Native grass from the upland district of southern Norway. This sample is from the experiment station at Aas." (*Hansen.*)
- 20596. HORDEUM VULGARE.** **Barley.**
 From Bjaerkoe, an island on the coast of northern Norway. "(No. 76.) An extremely early spring barley." (*Hansen.*)
- 20597. LUPINUS ANGUSTIFOLIUS (?).**
 From Aas, Norway. "(No. 77.) A perennial forage plant from the experiment station at Aas." (*Hansen.*)
- 20598. BRASSICA RAPA.** **Turnip.**
 From Aas, Norway. "(No. 78.) The yellow Finland turnip, from the experiment station at Aas." (*Hansen.*)
- 20599. BRASSICA RAPA.** **Turnip.**
 From Aas, Norway. "(No. 79.) Swedish turnip from the experiment station at Aas; obtained in 1902 from Mustiala, Finland." (*Hansen.*)
- 20600. HORDEUM VULGARE.** **Barley.**
 From the island of Donnes, Nordland, Norway. "(No. 80.) *Donnes.* Spring barley from the large estate Donnes, the proprietor of which is Mr. Isaac Coldevin, of Nordoevaagen. Donnes is an island in Nordland, the Arctic Circle province of Norway. This variety is not so early, but is more productive than the *Bjoerkeby* barley. Sample from the experiment station at Aas." (*Hansen.*)
