

20521 to 20795—Continued.

20694. CHAETOCHELOA ALOPECUROIDES.

From Khokand, Russian Turkestan. "(No. 174.) This millet makes very good hay, and cattle are fond of the seeds. It is also used by the natives as food. As found wild, there are two forms, one of yellow and one of red seed, and the two forms should be separated before sowing." (*Hansen.*)

20695. CHAETOCHELOA ALOPECUROIDES.

From Ussurie province, Pacific coast section, Siberia. "(No. 175.) Native form. See No. 174 (S. P. I. No. 20694)." (*Hansen.*)

20696. PHASEOLUS RADIATUS. Mung bean.

From Khokand, Russian Turkestan. "(No. 176.) Native *Masch.* A native legume." (*Hansen.*)

20697. PANICUM CRUS-GALLI. Barnyard millet.

From north China. "(No. 177.) Native name *Pisa.* See No. 155 (S. P. I. No. 20675)." (*Hansen.*)

20698. PHASEOLUS RADIATUS. Mung bean.

From Ussurie province, Pacific coast section, Siberia. "(No. 178.) Chinese name *Lango.* A native legume." (*Hansen.*)

20699. GLYCINE HISPIDA. Soy bean.

From Ussurie province, Pacific coast section, Siberia. "(No. 179.) From the farm of Mr. Fick, near Nicol'sk." (*Hansen.*)

20700. CHAETOCHELOA sp.

From Ussurie province, Siberia. "(No. 180.) This is one of the best forage plants of the Ussurie province of the Pacific coast section of Siberia, and was used freely for the Russian horses in the Russo-Japanese war. The native name is *Choomeeza.* The sample is a mixture of red-yellow seeds, with the yellow largely predominating." (*Hansen.*)

20701. CHAETOCHELOA ALOPECUROIDES.

From Manchuria. "(No. 181.) Native name *Hoon-kood-zha.* A yellow-seeded variety of millet brought from Manchuria by a Russian student-soldier in the Russo-Japanese war." (*Hansen.*)

20702. ANDROPOGON SORGHUM. Sorghum.

From Jahzavan, Marghilan district, Russian Turkestan. "(No. 182.) Native name *Joo-gar-ah.* A drought-resistant forage plant especially adapted to hot, dry climates. See No. 190 (S. P. I. No. 20710)." (*Hansen.*)

20703. PHASEOLUS ANGULARIS. Adzuki bean.

From south Ussurie, Pacific coast section, Siberia. "(No. 183.) *Weido.* A leguminous forage plant." (*Hansen.*)

20704. PANICUM CRUS-GALLI. Barnyard millet.

From Manchuria. "(No. 184.) Native name *Zan-Zah.* A good forage plant brought from Manchuria after the Russo-Japanese war." (*Hansen.*)

20705. ORYZA SATIVA. Upland rice.

From Manchuria. "(No. 185.) Native name *Zoo-za-mic.* Its northern origin makes it worthy of attention on the northern borders of our rice belt." (*Hansen.*)

20706. ANDROPOGON SORGHUM. Sorghum.

From south Ussurie, Pacific coast section, Siberia. "(No. 186.) *Gaolan.*" (*Hansen.*)
