

## 20521 to 20795—Continued.

## 20777. PINUS CEMBRA.

From Tomsk, Siberia. "(No. 257.) The common pine over a large section of central Siberia. The large seeds are a favorite dainty for dessert on Siberian tables." (*Hansen.*)

## 20778. PYRUS INTERMEDIA.

From Helsingfors, Finland. "(No. 258.) A native ornamental tree. The bright red berries are borne in great abundance and resemble those of a mountain ash." (*Hansen.*)

## 20779. BERBERIS sp.

Barberry.

From Djarkent, northern Russian-Turkestan, on the edge of China. "(No. 259.) A large-berried variety remarkable for the intense dark red color of the juice. It may prove to be *Berberis heteropoda*, which is a market berry in Turkestan." (*Hansen.*)

## 20780. PYRUS SINENSIS.

Japanese pear.

From Harbin, northern Manchuria. "(No. 260.) This pear is of poor quality, but juicy, and is representative of the pears of northern China and Manchuria." (*Hansen.*)

## 20781. SAMBUCUS RACEMOSA.

From Helsingfors, Finland. "(No. 261.) The native red-berried elder." (*Hansen.*)

## 20782. RIBES RUBRUM.

Red currant.

From Bodoe, Norway. "(No. 262.) The wild red currant from Bodoe, which is in 67° 20' N. lat., on the coast of Norway." (*Hansen.*)

## 20783. RUBUS CHAMAEMORUS.

Cloud berry.

From Bodoe, Norway. "(No. 263.) The wild raspberry here." (*Hansen.*)

## 20784. RUBUS IDAEUS.

European raspberry.

From Bodoe, Norway. "(No. 264.) A yellow-fruited form of the wild raspberry." (*Hansen.*)

## 20785. FRAGARIA VESCA.

Strawberry.

From Bodoe, Norway. "(No. 265.) The wild strawberry from north of the Arctic Circle." (*Hansen.*)

## 20786. HORDEUM VULGARE.

Barley.

From St. Petersburg, Russia. "(No. 266.) *Jarenskianum* × (*pallidum* × *lapponicum*), No. 448 of Dr. Robert Regel, of the Bureau of Applied Botany, Department of Agriculture, St. Petersburg. This is a representative of the barley grown on the northern boundary of barley culture in the provinces of Vologda and Archangel. Of special promise for Alaska and regions where the growing period is short." (*Hansen.*)

## 20787. ALOPECURUS PRATENSIS.

Meadow foxtail.

From Helsingfors, Finland. "(No. 267.) A valuable grass highly regarded as making hay of as good quality as timothy. Suitable for moist soil. Finland exports an immense quantity of this, which is probably the best native grass, to other countries." (*Hansen.*)

## 20788. TRIFOLIUM PRATENSE.

Red clover.

From Helsingfors, Finland. "(No. 268.) Native red clover of Finland. Claimed to be hardier than the red clover from America and a smoother plant." (*Hansen.*)
