"Timor and North Australia; also New Guinea. This species proved well adapted for the lowland clime of Ceylon, growing fast and seeding freely." (*Dr. Henry Trimecn.*)

For experiments on the Canal Zone.

21395 to 21471. ORYZA SATIVA.**Rice.**

From Honolulu, Hawaii. Received through Mr. F. G. Krauss, in charge of Hawaii rice investigations, Hawaii Agricultural Experiment Station, October 1, 1907.

The rice seed bearing the following numbers was raised at the Hawaii Agricultural Experiment Station in 1906 from seed furnished by this office, and in each case the original S. P. I. number of the seed from which these samples were selected is given. According to Mr. Krauss the seed is considerably improved by selection over the original stock sent to Hawaii, which was of mixed strains and of weak germination.
