

## 129771 to 129802—Continued

## 120779. COPROSMA ROBUSTA Raoul. Rubiaceae.

A stout shrub 2 to 12 feet high, with pale-brown bark, shining-green leaves up to 5 inches long and 2 inches broad, and small greenish flowers in dense heads. The small red or yellow drupes are thickly set.

For previous introduction see 89230.

## 129780. COROKIA BUDDLEIODES A. Cunn. Cornaceae.

A small tree with long narrow leaves, shining above and downy beneath. The small yellow flowers,  $\frac{1}{4}$  inch long, are in slender panicles and are followed by small orange-red fruits. The native name is *korokia-taranga*.

## 129781. COXELLA DIEFFENBACHII (F. Muell.) Cheesem. and Hemsl. Apiaceae.

A stout, erect, herbaceous perennial 2 to 3 feet high, with flaccid, 3- to 4-pinnate radical leaves 1 to 2 feet long, the blade oblong or ovate-oblong in outline, and loosely panicked umbels of small white flowers. Native to damp places on the Chatham Islands.

## 129782 to 129785. HEBE spp. Scrophulariaceae.

## 129782. HEBE GIBBSII (T. Kirk) Cockayne and Allan.

A shrub up to  $1\frac{1}{2}$  feet high, with leathery, imbricating, ovate leaves  $\frac{1}{2}$  to  $\frac{3}{4}$  of an inch long and small white flowers in short dense racemes. Native to South Island, New Zealand.

## 129783. HEBE BAKAIENSIS (Armstrong) Cockayne.

A small rounded woody evergreen bush of compact habit, 2 to 5 feet high, with linear-oblong, flat leaves about 1 inch long and white flowers in dense oblong clusters.

For previous introduction see 89299.

## 129784. HEBE SALICIFOLIA (Forst. f.) Pennell.

An erect much-branched shrub 3 to 10 feet high, sometimes 15 feet, with thin, pale-green, lanceolate or oblong-lanceolate leaves 2 to 6 inches long and many small, white to pale bluish-purple flowers in slender racemes 3 to 10 inches long.

## 129785. HEBE TRAVERSII (Hook. f.) Cockayne and Allan.

A small compact evergreen shrub 2 to 5 feet in diameter, with spreading leathery leaves 1 inch long and racemes of small white flowers at the tips of the branches.

For previous introductions see 89313.

## 129786. LEUCOGENES GRANDICEPS (Hook. f.) Beauverd. Asteraceae.

A densely tufted perennial herb, 2 to 3 inches high. The densely imbricated, spreading or recurved leaves,  $\frac{1}{4}$  to  $\frac{1}{3}$  inch long, are obovate-spatulate, flat or concave, and clothed on both surfaces with appressed silvery tomentum. The small flowers are congested into a densely bracteate head.

For previous introduction see 101283.

## 129787. LIBERTIA IXIODES (Forst. f.) Spreng. Iridaceae.

A low herbaceous perennial, with a short creeping rhizome, which forms a compact clump like a beardless iris. It has rigid coriaceous linear leaves 1 foot long and large panicles of small white flowers on a stem 2 feet high.

For previous introduction see 125146.

## 129788. LINUM MONOGYNUM Forst. f. Linaceae.

Flax.

A smooth perennial herb 1 to 2 feet high, with scattered linear-lanceolate leaves 1 inch long and large white flowers 1 inch across, in terminal corymbs.

For previous introduction see 77565.
