

**130951. LACTUCA SERRIOLA L. Cichoriaceae.**

From Sweden. Seeds presented by the Director, Botanic Garden, Göteborg. Received November 21, 1938.

**130952 to 130957. ZEA MAYS L. Poaceae. Corn.**

From Bolivia. Seeds presented by J. W. Webster, La Paz, at the request of Dr. H. L. Blood, Agricultural Experiment Station, Logan, Utah, cooperating with the Division of Fruit and Vegetable Crops and Diseases, Bureau of Plant Industry, United States Department of Agriculture. Received November 23, 1938.

130952. *Amarillo*. From the lower La Paz region at 8,000 feet altitude (1938 crop).

130953. *Amarillo*. From the Sucre region at 7,000 feet altitude (1937 crop).

130954 and 130955. From the lower La Paz region at 8,000 feet altitude (1938 crop).

130954. *Blanco*.

130955. *Chuspillo*.

130956. *Gros*. From the lower La Paz region at 8,000 feet altitude (1938 crop).

130957. *Pacheco*. From the Sucre region at 7,000 feet altitude (1937 crop).

**130958. CRATAEGUS DUROBRIVENSIS Sarg. Malaceae.**

From California. Plants growing at the United States Plant Introduction Garden, Chico. Numbered November 23, 1938.

Growing under Chico P. I. G. 14253. Originally received as seeds from the Royal Botanic Garden, Kew, England. A shrub up to 18 feet high, with ovate leaves and many large showy flowers in compact corymbs. Native to the northern United States.

**130959. BIGNONIA RADICANS × CHINENSIS. Bignoniaceae.**

From Florida. Seeds presented by Hubert Buckley, Ruskin. Received November 27, 1937. Numbered in November 1938.

A woody vine, intermediate in character between its two well-known parents, the variety *Aurea* of the native trumpet creeper and the Chinese trumpet creeper. It may be trained as a bush or may be used as a low climber. The orange to scarlet flowers are borne profusely in early summer, even after winter-killing of the tops.

**130960 to 130962. ORYZA SATIVA L. Rice.**

From Peru. Seeds presented by Alberto Martin Lynch, Chief, Lambayeque Experiment Station, Lambayeque. Received November 17, 1938.

130960. *Benllok*.

130962. *Rubio*.

130961. *EAS 3*.

**130963 and 130964.**

From California. Seeds purchased from Howard S. Gates, Anaheim. Received November 22, 1938.

130963. *ECHINOCACTUS ACANTHODES* Lem. Cactaceae.

A very spiny cactus, globular, becoming cylindrical, sometimes 8 feet high, with many acute ribs about ½ inch high; white to bright-red, weak radial spines and awllike central spines. The campanulate yellow to orange flowers are 1½ to 2½ inches long. Native to southern California.

130964. *FEROCACTUS JOHNSTONIANUS* Britton and Rose. Cactaceae.

A simple, short-cylindrical cactus up to 2 feet high, with many spines in a cluster and red-tinged, yellowish flowers about 2 inches long. Native to Baja California.
