

132874 to 132883.

From India. Plants collected at Saharanpur by Walter Koelz, Bureau of Plant Industry. Received May 14, 1937. Numbered in May 1939.

132874. BARRINGTONIA ACUTANGULA (L.) Gaertn. Lecythidaceae.

A medium-sized evergreen tree with obovate leaves about 5 inches long and pendulous racemes of small pink flowers. The wood is soft and white with a pretty silver grain and is used for furniture. Native to India.

For previous introduction see 116718.

132875. ERYTHRINA sp. Fabaceae.

Received under the name "blackii," for which a place of publication has not been found.

132876. IXORA UNdulata Roxb. Rubiaceae.

A large evergreen shrub or small tree with thin, undulate lanceolate leaves 5 to 9 inches long and spreading, pyramidal or rounded corymbs of small greenish-white flowers. Native to India.

132877. IXORA sp.

132878. JASMINUM PUBESCENS (Retz.) Willd. Oleaceae. Slender jasmine.

A climbing or scrambling hairy shrub from Borneo. The opposite, narrow-ovate leaves are bright green above and pubescent beneath, and the fragrant white flowers, 1 inch across, are in large dense hanging heads.

132879. JASMINUM SAMBAO (L.) Ait.

Arabian jasmine.

Arabian jasmine is cultivated in India for the sake of the oil obtained from the fragrant flowers; it is used in perfumery.

For previous introduction see 61230.

132880. CAESALPINIA PULCHERRIMA (L.) Swartz. Caesalpinaceae.

Flowerfence.

For previous introduction see 114869.

132881. SHOREA ROBUSTA Gaertn. f. Dipterocarpaceae.

Salt-tree.

A large, resinous, gregarious forest tree up to 100 feet high or sometimes stunted, with large, oblong-ovate leaves and pale-yellow flowers $\frac{1}{2}$ inch long in lax terminal panicles. It is valued for its teaklike wood. Native to India.

132882. FIRMIANA COLORATA (Roxb.) R. Br. (*Sterculia colorata* Roxb.). Sterculiaceae.

A small deciduous tree, native to tropical Asia, with large roundish 3-lobed leaves and small, very numerous, vivid orange-scarlet flowers which appear in dense terminal panicles before the leaves. The tree is quick growing and probably flowers very young.

For previous introduction see 124731.

132883. STERculIA sp. Sterculiaceae.

132884. ANTHURIUM DOMINICENSE Schott. Araceae.

From Puerto Rico. Plants collected in the Marine Insular Forest, near the Mayaguez Experiment Station, by H. P. Traub, Bureau of Plant Industry. Received August 1, 1935. Numbered in May 1939.

A terrestrial or epiphytic anthurium with a short stem, rosulate leaves, the oblong-lanceolate to oblong-ovate blades 8 to 16 inches long, and a spadix of globular, reddish berries. Native to the West Indies.

132885. CHAMAEDOREA sp. Phoenicaceae.

Palm.

From Mexico. Plants presented by W. E. Sexton, Vero Beach, Fla., through the Bureau of Entomology and Plant Quarantine. Received July 18, 1935. Numbered in May 1939.
