

tough, light-colored wood and yields an aromatic resin or oleo-resin having very adhesive properties. The tree is native to the outer Himalayas where it ascends to 3,500 feet altitude.

For previous introduction see 94100.

133122. PYRUS sp. Malaceae.

Received under the specific name "macrantha," which is not a valid name.

133123 to 133127. SOLANUM spp. Solanaceae.

From the Union of Soviet Socialist Republics. Tubers presented by the Institute of Plant Industry, Leningrad. Received May 22, 1939.

133123. SOLANUM BOERGERI Bukasov.

A species native to Uruguay. Allied to *Solanum commersonii*.

For previous introduction see 133066.

133124. SOLANUM sp.

Received under the specific name "dolichostigma," for which a place of publication has not been found.

133125 and 133126. SOLANUM MACOLAE Bukasov.

An herb with stems over 1 foot high, native to Argentina.

133125. D. 55.

133126. D. 70.

For previous introduction see 133079.

133127. SOLANUM SCHICKII Juzepchuk and Bukasov.

An herb, native to Argentina. Allied to *Solanum chacoensis*.

For previous introduction see 133085.

133128 and 133129. TRITICUM AESTIVUM L. Poaceae.

Common wheat.

From Australia. Seeds presented by Dr. H. Wenzholz, Department of Agriculture, Sydney, New South Wales. Received May 23, 1939.

133128. *Eureka C. 12508.*

133129. *Eureka C. 12890.*

133130 to 133133.

From Southern Rhodesia. Plants presented through Douglas Aylen, Agricultural Experiment Station, Salisbury. Received May 22, 1939.

133130. BRACHIARIA DICTYONEURA (Fig. and DeNot) Stapf. Poaceae. Grass.

A tufted perennial with ascending stems up to 3 feet high. Native to tropical Africa. The grass grows well on very poor soils, forming a dense, fairly palatable sward, and it has the advantage that it can be readily established from seed.

For previous introduction see 127622.

133131. EULALIA GENICULATA Stapf. Poaceae.

Grass.

A perennial grass with stems about 2 feet high. Native to tropical Africa.

133132. MANISURIS ALTISSIMA (Poir.) Hitchc. (*Rottboellia altissima* Poir.). Poaceae.

A perennial grass with stems about 3 feet high, distributed through warm temperate and tropical regions in both hemispheres. Received as *Haemarthria fasciculata*, a synonym.

133133. LEERSIA HEXANDRA Swartz. Poaceae.

Grass.

A very leafy grass, native to Brazil, about 3 feet high; it is readily eaten by cattle.

For previous introduction see 77059.
