

## 143922 to 143950—Continued.

143941. *EUCALYPTUS PILULARIS* J. E. Smith. Blackbutt.

A slender tree 100 to 150 feet high, considered excellent for timber, especially for fence posts and telegraph poles. The honey from the flowers is reported to be of especially good quality. In California the tree grows well near the coast but does not thrive in the dry, hot interior valleys.

For previous introduction see 143772.

143942. *EUCALYPTUS POPULIFOLIA* Desf.

A compact, straight-growing tree up to 50 feet high, with lustrous, intensely green, 4-inch-long ovate leaves, and with panicles of small white flowers followed by very small fruits.

For previous introduction see 75646.

143943. *EUCALYPTUS PROPINQUA* Deane & Maiden.

A large tree, 120 feet high and 4 feet in diameter, native to New South Wales. The lanceolate leaves are 5 inches long, and the timber is durable either in or out of the ground.

For previous introduction see 141852.

143944. *EUCALYPTUS RESINIFERA* J. E. Smith. Mahogany gum.

A large tree with rough, reddish, fibrous, persistent bark. The heavy timber is rich red and is said to be strong and durable; because of the color the tree is also called red mahogany.

For previous introduction see 143774.

143945. *EUCALYPTUS ROBUSTA* J. E. Smith. Brown gum.

A handsome, symmetrically branched tree of moderate height, with bark of trunk persistent, rough, dark brown, and that of the branches reddish. The wood is said to be somewhat brittle.

For previous introduction see 143710.

143946. *EUCALYPTUS SALIGNA* J. E. Smith.

A tall tree with silvery-gray bark, native to New South Wales. The narrowly lanceolate leaves are 5 to 6 inches long, and the clusters of 4 to 8 white flowers are on short peduncles.

For previous introduction see 143775.

143947. *EUCALYPTUS TERETICORNIS* J. E. Smith. Slaty gum.

For previous introduction see 141861.

143948. *EUCALYPTUS TRIANTHA* Link. (*E. acmenioides* Schauer).

For previous introduction see 143778.

143949. *EUCALYPTUS UMBRA* R. T. Baker.

A small to moderately large tree with thick, coarse, fibrous, persistent bark and alternate, thick, shining, lanceolate to falcate-lanceolate, mature leaves. The timber is inferior. In Australia this is a tree of poor saline flats and ridges in proximity to salt water.

For previous introduction see 141863.

143950. *EUCALYPTUS* sp.

143951. *PASSIFLORA PURPUSII* Killip. Passifloraceae.

From Florida. Plants growing at the United States Plant Introduction Garden, Coconut Grove. Numbered May 5, 1942.

A passiflora with ovate, cordate leaves about 6 inches long and flowers about 2 inches wide. Native to Veracruz, Mexico.

For previous introduction see 124615.
