- 404304.** 4. Agricultural Experimental Station, Guaiba. Low, sod forming grass growing in association with *Paspalum plicatulum*. Willd.
- 404305.** 631. On Route BR 293, 52 km west of Bage. Sod forming, warm season, perennial grass. Inflorescence 51 to 76 cm high. Leaves 25 cm tall, short stolons. Adapted to fertile clay soil. Willd.
- 404306.** 660. On Route BR 472, 12 km south of Uruguaiana. Rhizomatous, warm season perennial grass. Large form of species. Willd.
- 404307.** *COLLAEA NEESII* (DC.) Benth. Fabaceae.
130. On Route BR 116, 23 km north of Vacaria. Prostrate vine forming a dense mat about 10 to 15 cm high. Willd.
- 404308 and 404309.** *DESMANTHUS DEPRESSUS* Humb. & Bonpl. Fabaceae.
404308. 134. Enroute to Antonion Prado, 20 km south of Vacaria, 2 km southwest of Samuel. Perennial erect plant 30 to 38 cm high. Woody, fusiform root. Seed shatters profusely when mature. Willd.
404309. 613. On Route BR 293, 37 km west of Pelotas. Perennial, warm season legume. Prostrate growth habit. Willd.
- 404310.** *DESMANTHUS VIRGATUS* (L.) Willd.
664. On Route BR 472, 37 km north of Uruguaiana. Erect, perennial legume to 0.9 m high. Large tap root. Willd.
- 404311.** *DESMODIUM ADSCENDENS* (Sw.) DC. Fabaceae. **Beggarweed.**
583. On Route BR 116, 57 km south of Porto Alegre. Stoloniferous, warm season legume 38 to 51 cm tall. Flowers purple, leaves small. Willd.
- 404312 and 404313.** *DESMODIUM AFFINE* Schl.
404312. 66. On Route BR 285, 24 km west of Vacaria. Growing in dry, rocky soil. Willd.
404313. 682. On Route BR 290, 59 km east of Sao Gabriel. Warm season, perennial legume to approximately 38 cm high. Willd.
- 404314 to 404319.** *DESMODIUM CANUM* (Gmel.) Schinz. & Thell. **Kaimi-clover.**
404314. 18 Agricultural Experimental Station, Guaiba. Most common species of *Desmodium* in Rio Grande do Sul. Willd.
404315. 125. On Route BR 116, 20 km north of Vacaria. Willd.
404316. 142. One km northwest of San Manoel. Erect plant to 30 cm high. Growing on rocky mountain roads in association with *D. uncinatum*, *D. adscendens* and an unknown species. Willd.
404317. 585. On Route BR 116, 57 km south of Porto Alegre. Stoloniferous, warm season, perennial legume 25 to 38 cm high. Willd.
404318. 614. On Route BR 293, 37 km west of Pelotas. Perennial, warm season legume. Erect stems 30 to 40 cm high. Willd.
404319. 681. On BR 290, 59 km east of Sao Gabriel. Warm season, perennial legume. Willd.
- 404320 and 404321.** *DESMODIUM CUNEATUM* Hook. & Arn. **Beggarweed.**
404320. 70. On Route BR 285, 43 km west of Vacaria. Erect, stemmy plant to approximately 51 cm high. Willd.
404321. 140. On Route BR 116, 19 km south of Vacaria. Erect plant to 1.2 m high. Willd.
