

- PI 568056 **origin:** China. **collected:** August 28, 1991. **collector:** T.A. Campbell, L.R. Teuber, D.P. Mowrey. **collector id:** CTM 31. **other id:** W6 9891. **group:** W6. **locality:** Slightly rolling area on Mongolian Plateau. Sandy loam, few stones, good drainage, pH 6.6. Full sun. Grassland with little grazing, heavy vegetation. 40% ground cover. 3000kg/ ha biomass. 50km S of Xlinhot, Hutan Lan. **latitude:** 43 deg. 28 min. N. **longitude:** 116 deg. 05 min. E. **remarks:** Plants vigorous, perhaps as a response to good fertility. Associated with *Leymus chinensis*, *Agropyron cristatum*, *Stipa* sp., *Agrostis* sp., *Bromus* sp. 50 plants sampled. 1 *M. ruthenica*/m. Perennial. Wild. Seed.
- PI 568057 **origin:** China. **collected:** August 30, 1991. **collector:** T.A. Campbell, L.R. Teuber, D.P. Mowrey. **collector id:** CTM 38. **other id:** W6 9898. **group:** W6. **locality:** Hilly area on Mongolian Plateau. Sandy loam, few stones, good drainage, pH 6.5. Full sun, 40 deg. slope, 25 deg. aspect. Grassland with large, rolling hills. Abundant vegetation. 50% ground cover. 40km SE of Xlinhot. **latitude:** 43 deg. 53 min. N. **longitude:** 116 deg. 20 min. E. **elevation:** 1143m. **remarks:** Plants upright to procumbent, some quite vigorous. Quite a few of the best plants were near bottom of hill in dry gully. Associated with *Artemisia* sp., *Caragana intramongolica*, *Stipa* sp., *M. sativa* ssp. *sativa* and *falcata*. 45 plants sampled. 3 *M. ruthenica*/m. Perennial. Wild. Seed.
- PI 568058 **origin:** China. **collected:** August 30, 1991. **collector:** T.A. Campbell, L.R. Teuber, D.P. Mowrey. **collector id:** CTM 39. **other id:** W6 9899. **group:** W6. **locality:** Hilly area on Mongolian Plateau. Sandy loam, some stones, good drainage, ph 6.4. Full sun, 45 deg. slope, 60 and 150 deg. aspect. Grassland with large rolling hills, 1/2 way up hill, many in draw. 50% ground cover. 40km SE of Xlinhot. **latitude:** 43 deg. 53 min. N. **longitude:** 116 deg. 20 min. E. **elevation:** 1150m. **remarks:** Plants upright to procumbent, some quite vigorous. Associated with *Stipa* sp., *Achnatherum* sp., *Caragana intramongolica*, *Leymus chinensis*. 50 plants sampled. 100 kg/ha est. biomass. 3 *M. ruthenica*/m. Perennial. Wild. Seed.
