

27662 to 27674—Continued.**27671. JUNIPERUS FOETIDISSIMA Willd.**

From Tiflis, Caucasus, Russia. "(No. 1297a, Mar. 22, 1910.) A tall-growing tree, occurring on dry places. Of value as an ornamental and timber tree in dry regions where fairly mild winters prevail. Obtained from the Tiflis Botanical Garden." (*Meyer.*)

Distribution.—In the coniferous forests on the subalpine and alpine slopes of the mountains of Greece, and in Armenia and the Province of Karabagh in southeastern Russia.

27672. JUNIPERUS OXYCEDRUS L.

From Tiflis, Caucasus, Russia. "(No. 1298a, Mar. 22, 1910.) Obtained from the Tiflis Botanical Gardens." (*Meyer.*)

See No. 26884 for further description.

27673. JUNIPERUS COMMUNIS L.

From Tiflis, Caucasus, Russia. "(No. 1299a, Mar. 22, 1910.) This well-known shrub, occasionally growing into a small tree, occurs on many places in the Caucasus and is worthy of test as an ornamental evergreen in the semiarid sections of the United States. Obtained from the Tiflis Botanical Garden." (*Meyer.*)

Distribution.—Europe, northern Asia, northern China, the mountains of northern Africa, and in the United States from the Canadian boundary southward to North Carolina, Arizona, and northern California.

27674. PAEONIA MLOKOSEWITSCHI Lomakin.

From Tiflis, Caucasus, Russia. "(No. 1300a, Mar. 22, 1910.) A rare, herbaceous, native Caucasian peony, bearing yellow flowers. Obtained from the Tiflis Botanical Garden." (*Meyer.*)

Distribution.—Slopes of the Caucasus Mountains in the Province of Talysch in southeastern Russia.

27675. MEDICAGO ARABICA (L.) All.

From Sukhum-Kale, Caucasus, Russia. Received through Mr. Frank N. Meyer, agricultural explorer, Mar. 31, 1910.

This was picked out of No. 27343; see this number for remarks.

27676 to 27679.

From Loutulim, Goa, Portuguese India. Presented by Mr. F. S. Cardosa. Received Apr. 16, 1910.

Seeds of the following:

27676. CANAVALI GLADIATUM (Jacq.) DC.

27677. CANAVALI OBTUSIFOLIUM (Lam.) DC.

27678. DOLICHOS LABLAB L.

Bonavist bean.

27679. MIMUSOPS KAUKI L.

"Adam's-apple."

See No. 25909 for description.

"This is a very large, hard, timber tree, very productive. Its fruit is a berry about the size of a small egg and is very palatable and delicious when the trees are carefully cultivated." (*Cardosa.*)
