

**27814 to 27829**—Continued.**27819. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1278a, Mar. 19, 1910.) A round, white bean, said to be very productive; comes from the Kherson Government in southwest Russia. To be tried in semiarid sections of the United States." (*Meyer.*)

**27820. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1279a, Mar. 19, 1910.) A small, white bean; comes from the Kherson Government, southwest Russia. Much eaten by Jewish residents in Russia. To be tried in semiarid sections of the United States." (*Meyer.*)

**27821. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1280a, Mar. 19, 1910.) A long, white bean, native to this section of the Caucasus. To be tried in semiarid sections of the United States." (*Meyer.*)

**27822. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1281a, Mar. 19, 1910.) A round, speckled bean, native to the Caucasus and often seen exposed for sale. To be tried in semiarid sections of the United States." (*Meyer.*)

**27823. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1282a, Mar. 19, 1910.) A long, speckled bean, native to the Caucasus. To be tried in semiarid sections of the United States." (*Meyer.*)

**27824. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1283a, Mar. 19, 1910.) A handsome, long, red bean. An old native Caucasian variety said to come from Vladikavkas. Very much liked by the natives who use beans in summer instead of meats. To be tried in semiarid sections of the United States." (*Meyer.*)

**27825. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1284a, Mar. 19, 1910.) A round, thick, dark-red bean, native to the Caucasus. Much eaten by the native population. To be tried in semiarid sections of the United States." (*Meyer.*)

**27826. PHASEOLUS VULGARIS L.**

From Tiflis, Caucasus, Russia. "(No. 1285a, Mar. 19, 1910.) A flat, red bean, native to the Caucasus. To be tried in semiarid sections of the United States." (*Meyer.*)

**27827. PANICUM MILIACEUM L.**

From Tiflis, Caucasus, Russia. "(No. 1291a, Mar. 22, 1910.) A large-grained, white proso, considered to be the best variety in Tiflis. To be tested in regions with a limited rainfall. Purchased in Tiflis." (*Meyer.*)

**27828. PANICUM MILIACEUM L.**

From Tiflis, Caucasus, Russia. "(No. 1292a, Mar. 22, 1910.) A reddish proso, said to be very drought resistant. Purchased in Tiflis, in the vicinity of which it grows. To be tried in semiarid regions." (*Meyer.*)

**27829. HORDEUM VULGARE NIGRUM (Willd.) Beaven. Black barley.**

From Tiflis, Caucasus, Russia. "(No. 1301a, Mar. 23, 1910.) This is grown in the vicinity of Tiflis, mostly as a winter grain, and extensively used as a feed for horses instead of oats, as the last do not grow well in the Caucasus. This barley is generally soaked over night before being fed to the animals." (*Meyer.*)
