

**33588 to 33594—Continued.**

Seeds of the following; quoted notes by Mr. Piper:

**33588.** ACER OBLONGUM Wall. Maple.

“(No. 126, September 23, 1911.) A handsome maple tree with oblong leaves. Abundant on the mountain slopes at Mussoorie, India, and also cultivated at Dehra Dun.”

**33589.** BERBERIS sp. Barberry.

“(No. 129, September 23, 1911.) From Mussoorie. A shrub growing 6 to 12 feet high, with black berries. Perhaps the same as the species collected at Newara Eliya (S. P. I. No. 32102).”

**33590.** CUCUMIS MELO L. Muskmelon.

“(No. 109, September 19, 1911.) Purchased in the market at Lucknow. Quality only fair.”

**33591.** MEIBOMIA sp.

(*Desmodium* sp.)

“(No. 130, September 23, 1911.) From Mussoorie. A shrub 6 to 12 feet high with handsome pink flowers, flowers in racemes. Decidedly ornamental.”

**33592.** ROSA sp. Rose.

“(No. 125, September 23, 1911.) From Mussoorie. A half-climbing species growing to a height of 6 to 12 feet. Flowers not seen.”

**33593.** IMPATIENS sp.

“(No. 131, September 23, 1911.) From Mussoorie. A much-branched species growing 3 to 5 feet high, with numerous purple flowers. Very abundant at Mussoorie.”

**33594.** IMPATIENS sp.

“(No. 132, September 23, 1911.) From Mussoorie. A species with small stems, 1 to 2 feet high, bears yellow flowers.”

**33595 to 33623.**

From India. Collected by Mr. C. V. Piper, Bureau of Plant Industry, and forwarded by the American consul general, Calcutta, India. Received April 26, 1912.

Seeds of the following; quoted notes by Mr. Piper:

**33595.** ANDROPOGON ANNULATUS Forsk.

“(No. 139.) Seed from Lahore; collected September 29, 1911.”

**33596.** ANDROPOGON ANNULATUS Forsk.

“(No. 107.) One of the abundant grasses of the Ganges Valley, growing to a height of from 2 to 3 feet and said to furnish an excellent quality of hay. Collected at Lucknow, September 19, 1911.”

**33597.** ANDROPOGON PERTUSUS (L.) Willd.

“This seed was presented by Mr. A. C. Hartless, Superintendent of the Botanical Gardens, Seharunpur, India. One of the most abundant grasses of the Ganges Valley, growing 2½ feet high, with fine stems, and considered to furnish an excellent quality of hay.”

**33598.** ALYSICARPUS VAGINALIS (L.) DC.

“(No. 118, September 26, 1911.) From Dehra Dun. A spreading legume; considered one of the best grazing plants for cattle.”
