**34147 to 34151. MEDICAGO spp.**

From Jerusalem, Palestine. Presented by Mr. E. F. Beaumont. Received July 19, 1912.

Seeds of the following:

**34147. MEDICAGO CORONATA (L.) Gaertn.**

"I am very much impressed with the very hardy character of this. It is found in all localities and especially on rocky mountain sides where the soil is only a few inches deep on the rock. This year the later rains were practically a failure, a fact which further shows its drought-resisting qualities. Although its seeds are small, it reseeds with ease." (Beaumont.)

**34148. MEDICAGO RUGOSA Desr.**

*Distribution.*—The countries bordering on the Mediterranean from Spain through Italy and Greece to Asia Minor and Syria, and in northern Africa.

**34149. MEDICAGO MARINA L.****34150. MEDICAGO MINIMA (L.) Grufb.****34151. MEDICAGO ROTATA Boiss.**
