

**A NEW PALMETTO (*INODES EXUL* O. F. COOK), DISCOVERED BY MR. COOK AT VICTORIA, TEX. (S. P. I. No. 35116.)**

The two tall palms on the left are *Washingtonia filifera*, while the two on the right are of the new species, probably of Mexican origin. This Victoria palmetto may find a place in the front rank of ornamental palms. (Photographed by O. F. Cook and C. B. Doyle.)
