

THE VERANERO AVOCADO (*PERSEA AMERICANA* MILL.) FROM CARACAS, VENEZUELA.  
(S. P. I. No. 35121.)

A variety ripening its crops in March, at the end of the dry season; smaller than the August-ripening varieties, but of a characteristic yellow color and of a special, very fine flavor; grows at 1,400 meters altitude. Introduced through H. Pittier. (Photographed by Mr. Pittier, Crop Acclimatization No. 15536.)
