

35173 to 35200—Continued.

probably reach a greater height before its full growing season is over. The leaves are long, petioles short, blades lanceolate, 8 centimeters in length, very finely dentate, with whitish teeth, velvety to the touch, very green on the upper surface, and pale greenish beneath." (*Fruticetum Vilmorinianum Catalogue*, p. 125, 1904.)

35185. DEUTZIA sp.

Deutzia.

"From seed 6706 M. Vilmorin."

35186. JASMINUM sp.

Jasmine.

"From seed 4716 M. Vilmorin."

35187. LONICERA SIMILIS DELAVAYI (Franch.) Rehder.

Honeysuckle.

(*Lonicera delavayi* Franch.)

"A glabrous shrub with branches climbing to a considerable height. The leaves are broadly lanceolate, cordiform at the base, obtuse, pointed, or acuminate, ciliate, glabrous above, covered with a grayish tomentum below, measuring 4 inches long by 1½ inches broad above the base. The floral leaves are one-fifth as large. The flowers are yellowish white and have an agreeable odor. They are glabrous, with very slender cylindrical tubes 2 to 2½ inches long, with a bilobed limb three-fourths inch long. The fruit is bluish black, glaucous." (*Jour. Soc. Hort. France, ser. 4, vol. 1, p. 208, 1900.*)

See S. P. I. No. 34570 for previous introduction.

35188. LONICERA THIBETICA Bur. and Franch.

Honeysuckle.

"A shrub from 0.5 to 1.5 meters in height, with slender spreading and recurving, often procumbent branches, forming a dense, intricate bush much broader than high; young branchlets villose-puberulous or tomentulose; older branches clothed with grayish-brown shedding bark. Flowers appear in May and June and sparingly during the whole summer and autumn. Fruit ripens in August and September. This *Lonicera* in the Arnold Arboretum proved hardy with slight protection during the winter and seems well suited for planting on rocky slopes and banks. The flowers are very fragrant, and the bright color of the berries makes the shrub ornamental in the autumn." (*Charles Sprague Sargent, Trees and Shrubs, vol. 1, p. 89, 1905.*)

35189. LONICERA sp.

Honeysuckle.

"From seed 5032 M. Vilmorin."

35190. LONICERA sp.

Honeysuckle.

"From seed 6872 M. Vilmorin."

35191. MALUS sp.

Apple.

"From Yunnan."

35192. PINUS sp.

Pine.

"From seeds 6393 and 6610 M. Vilmorin, from Szechwan."

35193. PYRUS sp.

Pear.

"From seed 6866 M. Vilmorin."

35194. RIBES HIMALAYENSE URCEOLATUM Jancsewski.

"This black-fruited shrub, from 2 to 3 meters high, is from Fang Hsien, western Hupeh. Was found growing in thickets at an altitude of 2,250 meters, September, 1907 and 1910." (*Plantae Wilsonianae, vol. 1, p. 44, 1911.*)

35195. RIBES sp.

"With large fruits."
