

**37036 to 37058.**

From Fusan, Chosen (Korea). Presented by Rev. George H. Winn, Presbyterian Mission. Received January 28, 1914.

Quoted notes by Mr. Winn.

"The white beans are the ones that are generally raised. In the cultivation of the beans they are generally planted in rows about 2 feet apart, sometimes a little wider, and are well fertilized. Needless to say the weeds are kept down by hand hoeing three or four times during the summer. The beans are planted here in May or early in June and harvested in November as a rule, though even in October we occasionally see the harvesting of the beans in specially well-favored places. The harvesting is entirely done by hand (as is all farm work except plowing) after which the beans are carried to the thrashing floor, where they are thoroughly dried in the sun and thrashed by the flail."

**37036 and 37037.** SOJA MAX (L.) Piper. Soy bean.  
(*Glycine hispida* Maxim.)

**37036.** "No. 1. *Yulgochi* bean. Very hardy, will grow and produce where the ordinary beans will not amount to much."

**37037.** "No. 2. *Kambool*. Very commonly found in the markets."

**37038 and 37039.** PHASEOLUS ANGULARIS (Willd.) W. F. Wight. Adzuki bean.

**37038.** "No. 3. The gray bean; very hardy, will grow and produce where the ordinary beans will not amount to much."

**37039.** "No. 4. The white-eye black bean; carefully cultivated and given sufficient fertilizer."

**37040 to 37055.** SOJA MAX (L.) Piper. Soy bean.  
(*Glycine hispida* Maxim.)

**37040.** "No. 5. Brown mottled bean; carefully cultivated and given sufficient fertilizer."

**37041.** "No. 6. Brown. Planted around the edges of the rice fields or where there is a small corner that can be utilized, they are very hardy and will grow and produce where the ordinary beans will not amount to much."

**37042.** "No. 7. Large white-eyed bean; carefully cultivated and given sufficient fertilizer."

**37043.** "No. 8. Large green bean. The larger beans are all carefully cultivated and given sufficient fertilizer."

**37044.** "No. 9. Black mottled brown bean. As a rule, the smaller beans are planted around the edges of the rice fields or where there is a small corner that can be utilized. They are very hardy and will grow and produce where the ordinary beans will not amount to much."

**37045.** "No. 10. White mottled black bean; carefully cultivated and given sufficient fertilizer."

**37046.** "No. 11. Ordinary green bean. As a rule, these beans are planted around the edges of the rice fields or where there is a small corner that can be utilized. They are, however, often planted
