

**40677 to 40770**—Continued. (Quoted notes by Mr. F. N. Meyer.)

on game and on fish dishes, replacing lemon juice in all sections where the latter is not available. Of value as an ornamental shrub for bordering sidewalks and paths in parks and gardens in the cooler sections of the United States."

**40687. BERBERIS sp.**

"(No. 2212a. Near Kagoba, south of Siku, Kansu, China. October 31, 1914.) A barberry of very low growth, being only from 1 to 3 feet high; foliage very small, berries light carmine, juicy, produced in great masses. Found along embankments and on fields at altitudes from 6,000 to 10,000 feet; fruit ornamental. Of value, like the preceding number, as an ornamental shrub for bordering sidewalks and paths in parks and gardens in the cooler sections of the United States."

**40688. BERBERIS AGGREGATA** Schneider.

"(No. 2213a. Near Siku, Kansu, China. October 20, 1914.) A low-growing barberry with very small fruits and foliage. Found amidst stony débris at an altitude of 4,500 feet. Possibly a form of the preceding number [S. P. I. 40687]. Of value as an ornamental shrub for bordering sidewalks and paths in parks and gardens in the cooler sections of the United States."

**40689 to 40691. LONICERA spp. Caprifoliaceæ. Honeysuckle.****40689. LONICERA sp.**

"No. 2214a. Near Chiaochuanchen, near Chenghsien, Kansu, China. October 5, 1914.) A shrubby honeysuckle, found along mountain bases. Foliage large; berries large and dull red color; of somewhat open habit. Of use as an ornamental shrub for parks and gardens."

**40690. LONICERA THIBETICA.** Bur. and Franch.

"(No. 2215a. Near Taochow, Kansu, China. November 25, 1914.) A low shrubby honeysuckle of somewhat spreading growth. Cuttings sent under No. 1240 [S. P. I. No. 39915], which see for further description."

**40691. LONICERA sp.**

"(No. 2216a. Near Taipintze, near Taochow, Kansu, China. November 29, 1914.) A low-growing species of shrubby honeysuckle, having slender branches and small foliage, of habit similar to the preceding number [S. P. I. 40690]. Collected at an altitude of 10,000 feet. Of value as a border shrub for the cold and dry sections of the United States."

**40692 to 40694. VIBURNUM spp. Caprifoliaceæ.****40692 and 40693. VIBURNUM KANSUENSE** Batalin.

**40692.** "(No. 2217a. Near Kagoba, south of Siku, Kansu, China. October 31, 1914.) A tall Viburnum of loose, open growth; leaves of oblong form, bunches of berries large and dense. Found among scrub on stony mountain sides at altitudes between 6,000 and 9,000 feet. The red berries of this shrub are sour, very juicy, and of agreeable flavor. They can be utilized in making vinegar and refreshing drinks. Of value as an ornamental shrub for the cooler regions of the United States."
