

47132 to 47145—Continued.

pear on the same tree. Blossoms in mid-April. (*Miyoshi*, p. 98, under *P. serrulata* Lindl. forma *candida*.)

"Flowers pale pink, single or semidouble, very large and fragrant. This is a very striking form." (*Wilson*, p. 51, under *P. lannesiana* forma *ariake*.)

47133. "*Choshuhizakura*." A medium-sized tree with spreading top, brown-gray twigs, deep-red young leaves, inflorescence in two to four flowered pedunculate umbels or corymbs, flowers 4 centimeters in diameter and uniformly rose color. The red young leaves and rose-colored flowers make this cherry very attractive. Blossoming time, mid-April. (*Miyoshi*, p. 121, under *P. serrulata* Lindl. forma *splendens*.)

"Flowers pink, single or semidouble. This form is of little horticultural interest." (*Wilson*, p. 51, under *P. serrulata* var. *sachalinensis* forma *choshuhizakura*.)

47134. "*Fugenzo*." A medium-sized tree with long, pendent inflorescences, two green leaflets in the flower bud, and striking full-blown flowers, red at first but soon becoming white. The flower buds open one after another, thus prolonging the blossoming time usually to the 1st of May. I have seen the last flower as late as the 1st of June. (*Miyoshi*, p. 123, under *P. serrulata* Lindl. forma *classica*.)

"One of the most beautiful of all cherries and now well known in gardens under the name of James H. Veitch. The flowers are rose pink, and the variety is distinguished by the presence of two leafy carpels in the center of each flower. Its Japanese name is *Kofugen* or *Benifugen*, and this and its white form (*alborosea*) are the only kinds of Japanese cherries which have green and leafy carpels." (*Wilson*, p. 39, under *P. serrulata* var. *sachalinensis* forma *fugenzo*.)

47135. "*Horinji*." A small tree with dark-gray twigs, yellowish brown young leaves, and flowers with roundish petals, the outer rank pink, the inner rank white. Blossoming time from the middle to the end of April. (*Miyoshi*, p. 110, under *P. serrulata* Lindl. forma *decora*.)

"This is a very beautiful form, with clusters of pale-pink double or semidouble flowers." (*Wilson*, p. 40, under *P. serrulata* var. *sachalinensis* forma *horinji*.)

47136. "*Kanzakura*." "Flowers single, pale pink, and rather small. A curious cherry which blooms in late winter, hence its Japanese name *Kanzakura*, i. e., winter cherry." (*Wilson*, p. 31, under *P. serrulata* var. *spontanea* forma *praecox*.)

47137. "*Kokonoye*." A small tree with erect slender branches, light-gray twigs, brownish green young leaves, inflorescence in two to four flowered pedunculate umbels or false umbels with uniformly pink flowers. Blossoms in mid-April. (*Miyoshi*, p. 107, under *P. serrulata* Lindl. forma *homogena*.)

47138. "*Kongozan*." "Flowers pink, single. This form is of little horticultural interest." (*Wilson*, p. 52, under *P. lannesiana* forma *kongosan*.)

47139. "*Oshimazakura*." A large tree with young leaves delicate brown turning to green, green peduncles, green calyces, and large, white, fragrant flowers in four to five flowered corymbs. (*Miyoshi*, p. 42, under *P. mutabilis* forma *speciosa*.)
