

## 50102 to 50206—Continued.

- 50142.** *COFFEA LAURENTHI* Wildem. Rubiaceæ. Coffee.  
A white-flowered shrub, native to Belgian Kongo, with dark-green, oval acuminate leaves up to 30 centimeters in length and shortly elliptic 2-seeded fruits. The roundish seeds are 9 to 11 millimeters long. (Adapted from *Actes du Premier Congrès de Botanique, 1900, p. 234.*)  
For previous introduction, see S. P. I. No. 32359.
- 50143.** *COIX LACRYMA-JOBI* L. Poaceæ. Job's-tears.  
"A hardy form grown at an altitude of 4,850 feet."  
For previous introduction, see S. P. I. No. 48012.
- 50144.** *COMBRETUM* sp. Combretaceæ.  
"(No. 245/19.) From The Matoppos, Matabeleland."
- 50145.** *COMBRETUM* sp. Combretaceæ.  
"(No. 233/19.) Potgietersrust, Waterberg district, Transvaal."
- 50146.** *COMBRETUM* sp. Combretaceæ.  
"Seeds of a tree somewhat like an olive in foliage but much larger, being 40 to 50 feet high. It is a larger spreading tree, giving a good shade; apparently hard wooded. The native name is *Cotamo*. Collected by Maj. R. Gordon at Shemba, Zambezi River, Mozambique, August 8, 1919."
- 50147.** *DIPLORHYNCHUS* sp. Apocynaceæ.  
"*Manyanyata*. A tree near Elizabethville, Belgian Kongo."
- 50148.** *DIPLORHYNCHUS* sp. Apocynaceæ.  
"*Mwenge*."
- 50149.** *ELEPHANTORRHIZA ELEPHANTINA* (Burch.) Skeels. Mimosaceæ.  
(*E. burchellii* Benth.)  
"Root used in tanning and dyeing stuffs a brown color."  
For previous introduction, see S. P. I. No. 46902.
- 50150.** *ERAGROSTIS CURVULA* (Schrud.) Nees. Poaceæ. Grass.  
A very densely tufted South African perennial grass with tender erect stems 1 to 2 feet high and narrow blades sometimes more than a foot in length. (Adapted from *Thistleton-Dyer, Flora Capensis, vol. 7, p. 599.*)  
For previous introduction, see S. P. I. No. 38767.
- 50151.** *ERYTHRINA CAFFRA* Thunb. Fabaceæ.  
"Magaliesberg, Transvaal."  
A tree, 30 to 60 feet high, with prickly branches, trifoliolate leaves with broadly ovate leaflets, and scarlet flowers borne in dense, many-flowered racemes. It is native to South Africa. (Adapted from *Harvey and Sonder, Flora Capensis, vol. 2, p. 236.*)
- 50152.** *GAZANIA* sp. Asteraceæ.  
"A yellow *Gazania* from Mr. Healtie, Addo, Southern Provinces, Nigeria."
- 50153 and 50154.** *GREWIA MONTICOLA* Sond. Tiliaceæ.  
A much-branched spreading shrub with densely tomentose twigs and almost sessile, unequally sided leaves. The flowers are borne in axillary few-flowered clusters. The shrub is native to the Transvaal. (Adapted from *Harvey and Sonder, Flora Capensis, vol. 1, p. 226.*)  
**50153.** "(No. 236/19.) Potgietersrust, Transvaal. Small evergreen tree."  
**50154.** "(No. 232/19.) Waterberg district, Transvaal. Fruit edible."
