

50315 to 50324—Continued.

colored, more rarely yellowish white or pure white. The black narrow pods are about an inch long. (Adapted from *Ascherson and Graebner, Synopsis der Mitteleuropäischen Flora, vol. 6, pt. 2, p. 953.*)

For previous introduction, see S. P. I. No. 32204.

50324. VICIA SYLVATICA L.

A perennial weak-stemmed vetch from northern and eastern Europe, sometimes over 5 feet high, with mucronate narrow leaflets, whitish flowers with lilac-colored stripes, and elongate, pendent black pods about an inch long. (Adapted from *Ascherson and Graebner, Synopsis der Mitteleuropäischen Flora, vol. 6, pt. 2, p. 925.*)

For previous introduction, see S. P. I. No. 31085.

50325. MIDA ACUMINATA (R. Br.) Kuntze. Santalaceæ. Quandong.
(*Fusanus acuminatus* R. Br.)

From Sydney, New South Wales. Seeds presented by the Forestry Commission. Received May 6, 1920.

For previous introduction, see S. P. I. No. 49893.

50326. CITRUS NOBILIS DELICIOSA (Ten.) Swingle. Rutaceæ.
Tangerine.

From Jhelam, Punjab, India. Budwood presented by Mrs. Ralph R. Stewart. Received May 7, 1920.

"(Jhelam, Punjab. March 11, 1920.) *Naranji tangerine.*" (Stewart.)

For previous introduction, see S. P. I. No. 45933.

50327. AMORPHOPHALLUS sp. Araceæ.

From Singapore, Straits Settlements. Tuber presented by I. Henry Burkill, director, Botanic Gardens. Received May 7, 1920.

"A tuber of a species of *Amorphophallus* from the Waterfall Garden in Penang. It came from the Kedah Peak, where *Amorphophallus prainii* may well occur." (Burkill.)

50328 to 50331.

From Pancajche, Alta Vera Paz, Guatemala. Seeds presented by Harry Johnson. Received May 7, 1920. Quoted notes by Mr. Johnson.

"These blackberries were collected at Tactic, Alta Vera Paz, at altitudes of 5,000 to 6,000 feet."

50328. RUBUS sp. Rosaceæ. Blackberry.

"(No. 1. April 13, 1920.) A remarkably fruitful blackberry of vigorous growth, with canes up to an inch in diameter and sharp, hooked spines which are not very numerous. The fruits, which are borne in big terminal clusters of 15 to 35 berries, are of good flavor and rather long. The seeds are not objectionable, as in so many cultivated varieties. These seeds are all from one plant."

50329. RUBUS sp. Rosaceæ. Blackberry.

"(No. 2. April 13, 1920.) A vigorous vine; the canes are covered with glandular hairs. It is a medium bearer, with good-sized fruits."
