

*Cotoneaster bullata floribunda* (Stapf) Rehder & Wilson. (Malaceae.) 43836. Plant from Jamaica Plain, Mass. Presented by the Arnold Arboretum. A shrub, with oval or narrower dark green bullate leaves, up to 3 inches in length. The flowers are white tinged with pink, but are of little ornamental value because they fall off soon after appearing, and do not attain much size. The globose red fruits occur abundantly in September on the upper sides of the long arching shoots, and give the plant a very beautiful appearance. This shrub is found in western China. (Adapted from Curtis's Botanical Magazine, vol. 135, plate 8284, under *Cotoneaster moupinensis floribunda*.)

*Decumaria sinensis* Oliver. (Hydrangeaceae.) 43839. Plant from Jamaica Plain, Mass. Presented by the Arnold Arboretum. A climbing shrub from Central China with generally oblong or obtuse leaves up to 3 inches in length, and small white flowers in terminal corymbs. The fruit is a capsule filled with numerous minute seeds. This shrub is very ornamental because of its handsome glossy foliage and the white flowers are very fragrant. It thrives in almost any humid soil and is propagated by greenwood cuttings in summer glass, and rarely by seeds. (Adapted from Rehder, in Bailey, Standard Cyclopaedia of Horticulture, vol. 2, p. 974.)

*Enkianthus campanulatus* (Miq.) Nichols. (Ericaceae,) 43845. Plants from Jamaica Plain, Mass. Presented by the Arnold Arboretum. A Japanese shrub, 15 or occasionally 30 feet high, with elliptic leaves up to 3 inches long, and yellowish or pale orange flowers with darker veins, occurring in drooping racemes. One of the handsomest species and the most vigorous grower. In autumn the foliage turns a brilliant red. (Adapted from Rehder, in Bailey, Standard Cyclopaedia of Horticulture, vol. 2, p. 1115.)

*Indigofera amblyantha* Craib. (Fabaceae.) 43850. Plants of **indigo** from Jamaica Plain, Mass. Presented by the Arnold Arboretum. An upright shrub from central China, 3 to 6 feet high, with compound bright green leaves from 4 to 6 inches long, very numerous small pink flowers in slender axillary racemes, and linear hairy pods. The pink flowers bloom all summer long, and the shrub is propagated by cuttings and seeds. (Adapted from Bailey, Standard Cyclopaedia of Horticulture, vol. 3, p. 1646.)
