

Prunus mume Sieb. & Succ. (Amygdalaceae.) 45064. **Japanese apricot** plants grown at the Plant Introduction Field Station, Chico, California, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Oteno**. The 'Japanese Flowering Plum' is really an apricot. The picturesque form of the tree, its extremely fragrant blossoms and their beauty combined with the fact that it is one of the earliest of all trees to bloom, often so early that snow falls on the blooms, have made it the favorite of Japanese poets. It is hardy in the Atlantic coast states and even though its blossoms often get killed by frost it is worthy of extensive trial. Its fruits are sour and remind one of the American wild plum in flavor. They form, when pickled, an important part of the Japanese army ration." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45049. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Naden** (?). One of the loveliest of the very double, delicate pink varieties. Late flowering, about May 1. Flowers hang in clusters of 2 to 5 on long stems; buds at first deep pink and truncate as though their tips had been cut off. Expand slowly and form wonderful double very large ($1\frac{1}{2}$ inches) flat flowers with petals a delicate pink, deeper colored at the margins. Flowers in rifts. Tree extremely Japanese. Fairly vigorous. One of the loveliest for small lawn planting." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45050. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Hosokawa**. A very beautiful double-flowered form with truncate, deep pink buds and flat, light pink flowers in clusters of 2 to 3 on rather long pendent flower-stalks. Flowers very profusely. Resembles closely the **Naden** (S. P. I. 45049) but tree appears to be less vigorous. Late bloomer (May 1 in Maryland)." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45051. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In
