

the Woods". "Var. **Ojochin**. Flowers very slightly double, large ($1\frac{1}{2}$ inches), almost pure white on short upright stems; slightly fragrant; late flowering (May in Maryland). Though the flowers are not borne in masses and the tree is not therefore as showy as that of other varieties the unusual size and beauty of the individual flowers, resembling single roses, make it attractive for door yards. Foliage bronze and golden in autumn. Tree not very vigorous." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45052. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Daizen**. Single white medium-sized flowers (1 inch) with distinct cherry fragrance. Mid-season (April 20 to May 1 in Maryland). The flowers are scattered most attractively through the tree but the green leaves come out early mixing with them and preventing the tree from being very striking. Not one of the showy varieties but an unusually vigorous grower and produces many seeds. Foliage in autumn golden yellow." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45054. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Amenogawa**. Translated meaning Milky way. One of the most striking varieties because of its upright or fastigate growth. Peculiarly suited for architectural uses. Medium-sized white to very light pink flowers on short stems borne in great masses concealing the branches. Seen from below suggests characteristic name. Tree not very vigorous." (Fairchild.)

Prunus serrulata Lindley. (Amygdalaceae.) 45055. **Japanese flowering cherry** plants grown at the Plant Introduction Field Station, Rockville, Maryland, from scions presented by Mr. David Fairchild from his place "In the Woods". "Var. **Ussusumi**. Very late variety, May 1, with hanging, large, very double flowers borne in clusters. Petals are tinged with light brown giving them a strange not unattractive appearance. The young leaves borne at same time as the flowers are dark bronze. In autumn the foliage turns a claret red. Tree a fairly rapid grower but the trunk inclined to be tender. Flowers very profusely." (Fairchild.)
