

sweetish and the quality only fair. In some places in northern China this pear has proved to be the most profitable variety." (Reimer.)

Pyrus sp. (Malaceae), 46577. **Pear.** From China. Cuttings collected by Prof. F. C. Reimer, Superintendent, Southern Oregon Experiment Station, Talent. "No. 52. **Tang Li.** Obtained at Mao Shan, near Malanyu, Chihli, China. This is a large pear, ovate or ovate-oblong in shape, and of a russet color. The calyx is deciduous. The flesh is firm and the grit cells are not noticeable. The flavor is sweet and of fair quality. This is an interesting variety, since it shows some of the characteristics of *P. ussuriensis*, especially in leaf characters, while the russet color of the fruit is not characteristic of this species. It may be a hybrid with *P. ussuriensis* as one of the parents." (Reimer.)

Pyrus sp. (Malaceae), 46578. **Pear.** From China. Cuttings collected by Prof. F. C. Reimer, Superintendent, Southern Oregon Experiment Station, Talent. "No. 53. **Fo Chien Hsi.** Obtained at Mao Shan, near Malanyu, Chihli, China. This pear is of medium size, slightly flattened, yellowish in color, and with the calyx deciduous. The flesh is hard, juicy, and rather sweet. It is an excellent keeper and shipper. Highly regarded in northern China." (Reimer.)

Pyrus sp. (Malaceae), 46579. **Pear.** From China. Cuttings collected by Prof. F. C. Reimer, Superintendent, Southern Oregon Experiment Station, Talent. "No. 55. **Ma Li.** Obtained at Mao Shan, near Malanyu, Chihli, China. This flat pear is medium to large, yellow in color, russet toward the base, and covered with small, light dots. It has a deciduous calyx and the stem is of medium length. The flesh is firm, rather coarse, sweet, and fair in quality. It ripens the latter part of August in northern China." (Reimer.)

Pyrus sp. (Malaceae), 46580. **Pear.** From northern China. Cuttings collected by Prof. F. C. Reimer, Superintendent, Southern Oregon Experiment Station, Talent. "No. 58. **Yarh Li.** Obtained at Mao Shan, near Malanyu, Chihli, China. This is the most widely grown pear in northern China. It is of large size, and resembles Bartlett in shape. It has a beautiful, clear, light yellow color. The flesh is firm, juicy, and sweet, and free from grit cells. This pear possesses extraordinary
