

AMYGDALUS PERSICA. FEITCHENG PEACH.

Photograph of an orchard of the famous Fei or Feitcheng Peach taken by Mr. Frank N. Meyer at Feitcheng, Shantung, China, September 1, 1907. Scions were collected by Mr. Meyer from the trees in this orchard, but owing to the long voyage to America they arrived dead. From seeds secured, however, a plant is now growing in the Chico Gardens (see photograph on next sheet) and a large number of budded plants will be ready for distribution to experimenters when this seedling has fruited and shown its value.
