

Minutes of the joint meeting of the Pea and Cool Season Legume CGCs

The meeting was held at the Kellogg Conference Center in East Lansing, MI on November 3, 2017

Rebecca McGee called the meeting to order at 1:35pm

Members in attendance are listed below.

First Name	Last Name	E-mail
Bright	Agindotan	bright.agindotan@montana.edu
Sabine	Banniza	sabine.banniza@usask.ca
Kiela	Caudillo	kiela.caudillo@usask.ca
Luseko	Chilagane	chilagane@suanet.ac.tz
Clarice	Coyne	clarice.coyne@ars.usda.gov
Linda Yuya	Gorim	linda.gorim@usask.ca
Michelle	Hubbard	michelle.hubbard@agr.gc.ca
Rebecca	McGee	rjmcgee@wsu.edu
Kevin	McPhee	kevin.mcphee@montana.edu
Josephine	Mgbechi-Ezeri	josephi.mgbechiezeri@montana.edu
James	Myers	james.myers@oregonstate.edu
Steve	Noffsinger	steve.noffsinger@delmonte.com
Julie	Pasche	Julie.Pasche@NDSU.edu
Cecilia	Peluola	cecilia.peluola@montana.edu
Lyndon	Porter	lyndon.porter@ars.usda.gov
Jeff	Rumney	jrumney@usapulses.org
Jeff	Safe	jeff@critesseed.com
Todd	Scholz	tscholz@usapulses.org
Kristin	Simons	kristin.simons@ndsu.edu
Jamin	Smitchger	jasmitchger@yahoo.com
Lena	Syrovoy	lena.syrovoy@usask.ca
Bunyamin	Tar'an	bunyamin.taran@usask.ca
George	Vandemark	george.vandemark@ars.usda.gov
Eric	Von Wettberg	ebishop@uvm.edu
Junsheng	Zhou	juz425@mail.usask.ca

New Business

A) Election of officers

Pea CGC officers remain the same – Rebecca McGee, Chair; Kevin McPhee, Secretary

Cool Season Legume CGC officers were elected as nominated:

Chair – Lyndon Porter

Secretary – Julie Pasche

Weidong moved to accept the nominations and Bunyamin Taran seconded. Motion passed.

B) Evaluation projects

- a. Lyndon Porter reported on the BLRV project; 36 lines in the Pisum core collection were evaluated. BLRV inoculum was lost and he is actively looking for it in host plants across the landscape. 36 commercial lines were screened and he is working with a mapping population with Rebecca.
- b. Weidong Chen reported on powdery mildew screening. GH evaluations resulted in screening against *Erysiphe trifolii*. Jim Myers screened the germplasm in the field against *Erysiphe pisi* and found little complete resistance. KASP markers are available for *er-1*.
- c. Rebecca reported on changes to the evaluation proposal application procedures. 1) Funding levels have been changed to \$20-35,000 for 2 year projects, 2) Selection is based on the crop vulnerability statements. It was mentioned that the vulnerability statements for both CGCs needs to be updated. Kevin and Rebecca will lead the revision of the Pea vulnerability statements, Clare and Rebecca will lead the revision of the Cool Season Legume vulnerability statements. Lyndon commented that a statement on needs for pea was developed at the Bozeman meeting in Fall of 2016.

C) Plant Explorations

Clare Coyne reported on the planned exploration for lentil in Spain. Details and exchange guidelines are being worked out and the collection is expected to happen in 2018 or 2019.

D) Clare presented the curators report – new wild chickpea from Turkey collected by Eric Bishop von Wettberg and donated by UCD Doug Cook are now in the collection. A new collection of *Pisum fulvum* has been donated to WSU. As seed becomes available and permissions given, they will be added to the USDA germplasm collection.

E)

Old Business

None

Todd Scholz moved to adjourn the meeting and Weidong Chen seconded. The motion passed and the meeting was adjourned at 2:15pm
