

104345 to 104378—Continued.

104349. *COTONEASTER AMOENA* Wilson.
Malaceae.

A branching shrub, 8 to 5 feet high, native to Yunnan, China. The oval leaves are glossy green above and thickly coated with gray wool underneath. The small cymes of white flowers are followed by bright-red fruits.

For previous introduction see 76230.

104350. *COTONEASTER* sp. Malaceae.

Received as *Cotoneaster denticulata*, a name now referred to *Amelanchier denticulata*. These seeds, however, are those of a *Cotoneaster*.

104351 to 104369. *DELPHINIUM* spp.
Ranunculaceae. Larkspur.

104351. *DELPHINIUM ALTISSIMUM* Wail.

A perennial larkspur from the mountains of Nepal where it becomes 3 to 5 feet high with only a few shining-green, palmately five-lobed leaves 2 or 3 inches across and purplish flowers in an erect raceme.

104352. *DELPHINIUM AMOENUM* Stev.

A hardy herbaceous perennial, glandular hairy throughout, with stems about 2 feet high and palmately divided leaves. The pale-blue flowers are in simple dense racemes. Native to central Asia.

104353. *DELPHINIUM AZUREUM* Michx.

A hardy herbaceous perennial 1 to 2 feet high, finely gray pubescent, with deeply three- to five-parted leaves and sky-blue flowers. Native to the southern United States.

104354. *DELPHINIUM BICOLOR* Nutt.

A perennial larkspur about 3 feet high, from the Rocky Mountains near the source of the Columbia River. The three or more leaves are divided into short linear segments. The showy flowers have large bright-blue sepals and yellow petals veined with blue.

104355. *DELPHINIUM BRUNONIANUM* Royle.

A perennial larkspur a foot or less high, with five-parted leaves, the lobes sharply cut or toothed. The blue and purple flowers are in corymbs. Native to western Tibet at 14,000 feet altitude.

104356. *DELPHINIUM BULLEYANUM* Forrest.

An alpine larkspur 2 to 4 feet high, native to Yunnan, China, between 11,000 and 12,000 feet altitude. The long-stemmed leaves are palmately divided and incised serrate, and the deep rich-blue flowers are in a paniculate raceme.

104357. *DELPHINIUM DECORUM* Fisch.

A laxly upright perennial about 1 foot high. The three-parted leaves with bifid segments are often thick and somewhat succulent, and the handsome deep-blue flowers are in dense racemes. Native to California.

104358. *DELPHINIUM DELAVAYI* Franch.

A herbaceous perennial 2 to 3 feet high, with incised five-lobed leaves and

104345 to 104378—Continued.

dense racemes of blue flowers. It is native to Yunnan, China.

For previous introduction see 93886.

104359. *DELPHINIUM DYCTIOCARPUM* Steud.

A hardy perennial from Siberia with three- to seven-lobed leaves and blue flowers in a lax-branched raceme.

104360. *DELPHINIUM DUHMBERGII* Huth.

A perennial larkspur from southern Russia about 2 feet high, with five- to seven-parted leaves and pale-blue or white flowers in a narrow dense raceme.

104361. *DELPHINIUM FLEXUOSUM* Bleb.

A hardy perennial larkspur with violet flowers. Native to Armenia.

For previous introduction see 73973.

104362. *DELPHINIUM OCCIDENTALE* S. Wats.

An alpine larkspur, glandular pubescent throughout, with a stout stem 3 to 6 feet high and palmately lobed leaves. The purple or white flowers are in a loose terminal raceme. Native to the western United States.

104363. *DELPHINIUM PRZEWALSKII* Huth.

A Mongolian larkspur about 8 feet high, with three- to five-parted leaves, the divisions deeply lacinate, and sky-blue flowers that appear from July to September. Closely related to *Delphinium henryi*, which, however, blooms in March.

104364. *DELPHINIUM SCOPULORUM* STACHYDREUM Gray.

A form with narrow leaf lobes and an erect stem 3 to 7 feet high. The blue or purple flowers are in dense racemes. Native to the western United States.

104365. *DELPHINIUM SPECIOSUM* GLABRATUM Stapf.

A Himalayan variety about 3 feet high, with dark-blue flowers over an inch across, with a long spur.

104366. *DELPHINIUM TATSINENSIS* Franch.

A larkspur from western China, with slender stems and hairy leaves divided into three to five sections. The deep-blue flowers are in a large loose raceme.

104367. *DELPHINIUM TROLLIFOLIUM* A. Gray.

A hardy herbaceous perennial with stout elongated roots, erect stems 3 to 6 feet high, and thin five- to seven-parted leaves, orbicular in outline. The dark-blue flowers are in loose many-flowered racemes. Native to Oregon.

104368. *DELPHINIUM VESTITUM* Wats.

An alpine perennial with a hispid stem 1 to 3 feet high, palmately five- to seven-lobed leaves, sometimes a foot across, on long stems, and blue flowers in long dense racemes. Native to the temperate Himalayas from 8,000 to 12,000 feet altitude.
