

139336 to 139422—Continued

139353. CLERODENDRUM sp. Verbenaceae.

No. 317. From Manipa Island, May 6, 1940. A species, with gorgeous red flowers in spikes 15 inches long. The dark-green palmate-cordate leaves are about 15 inches long and wide.

139354. (Undetermined.)

No. 375. From the Bai River, Pajahi Bay, Halmahera Island, May 29, 1940. A large forest tree 50 feet high, with large, leathery, ovate leaves 6 inches long and large tangerine-red fruits that resemble those of *Terminalia catappa*.

139355. CORDIA sp. Boraginaceae.

No. 357. From Batjan Island, Moluccas, May 19, 1940. A strand tree, with broadly ovate, papery leaves up to 6 inches long, and tubular, salmon-colored flowers 1½ inches long and 1½ inches across the corolla.

139356. CORDIA sp.

No. 405. From the Loloda Islands, Halmahera, Moluccas, June 7, 1940.

139357. CYCAS sp. Cycadaceae.

No. 360. From Mandioli Island, Batjan, Moluccas, May 18, 1940. A cycad about 10 feet high, with a crown of glossy green leaves up to 9 feet long, the leaflets up to 1 foot long and ¾ inch wide. The fruits, ¼ inch in diameter, were distinctly flattened.

139358. DAEMONOROPS sp. Phoenicaceae.

Palm.

No. 436. *Yas-yas*. From Barrio Cabigaan, Aborlan, Palawan Island, Philippine Islands, May, 1940.

139359. DODONAEA sp. Sapindaceae.

No. 327. From Manipa Island, Moluccas, May 6, 1940. A strand tree common on the beach.

139360. DOLICHANDRONE SPATHACEA (L. f.) K. Schum. Bignoniaceae.

No. 368. From Mandioli Island, Moluccas, May 20, 1940. A medium-sized tree, with pale-green leaves and large yellow flowers.

139361. ERYTHRINA sp. Fabaceae.

No. 329. From Manipa Island, Moluccas, May 6, 1940. A large tree with dark-red flowers.

139362 to 139365. FICUS spp. Moraceae.

139362. FICUS sp.

No. 371. From Pajahi Bay, Halmahera, Moluccas, May 26, 1940. A tall, buttressed tree, 60 feet high, with large thin leaves, and round, pink-and-green fruits, 1½ inches in diameter, which apparently are not used by the natives.

139363. FICUS sp.

No. 384. From Kahatola Island, Loloda Group, Moluccas, June 1, 1940. A small, attractive tree, with numerous fruits, yellow becoming red, and about ½ inch in diameter. The oval acute leaves are about 6 inches long.

139364. FICUS sp.

No. 389. From Kahatola Island, Moluccas, June 3, 1940. A small tree, with oblong, acute pale-green leaves 5 inches long, and abundant small fruits, yellow becoming deep crimson.
