420995. PYRUS CALLERYANA Decne. Rosaceae. Callery pear.

From United States. Selected in 1969 by W. L. Ackerman from a population of 2,500 naturalized seedlings growing in the vicinity of the U. S. Plant Introduction Station, Glenn Dale, Maryland. Original tree is thought to be an open-pollinated seedling of 'Bradford'. This Columnar cultivar is named in honor of William E. Whitehouse, Senior Horticulturist (retired), U. S. Department of Agriculture, Beltsville, Maryland. Numbered March 24, 1978.

'Whitehouse'. Develops strong central leader with slender, upward arching branches, producing a very narrow columnar tree form. Leaves ovate-oblong with acute tips and undulate margins. Glossy green through summer months, dark red-purple in late autumn. Flowers five petaled, off white, blossoming before leaf emergence in most years and about one week after 'Bradford'. Fruits small (1 cm in diameter), round, russet, and sparsely set unless cross-pollinated with other clones. Proven resistant to fire blight, *Erwinia amylovora*, through natural infection and by field inoculation tests.

420996. PHASEOLUS VULGARIS L. Fabaceae. Common bean.

From United States. Seed presented by M. L. Robbins, Department of Horticulture, Clemson University, Charleston, South Carolina. Numbered February 17, 1978.

'Hickman'. Seeds dark, pods rough and tinged with purple. Resistant to root rot.

420997. SOLANUM ROSTRATUM Dunal Solanaceae. Buffalobur.

From The Netherlands. Seed presented by Hortus Botanicus, Toernooiveld, Nijmegen. Received December 29, 1977.

1800.
