

PI 512056 to 512079-continued

- PI 512077 **donor id:** B1 ID 89-1: afaf StSt TlTl. **origin:** United States. **other id:** GP-058. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.
- PI 512078 **donor id:** B1 ID 89-1: AfAf stst tlTl. **origin:** United States. **other id:** GP-059. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.
- PI 512079 **donor id:** B1 ID 89-1: afaf stst tlTl. **origin:** United States. **other id:** GP-060. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.

PI 512080 to 512087. *Pisum sativum* L. subsp. *sativum* FABACEAE Garden pea

Donated by: Auld, D.L., Dept. of Plant, Soils, and Ent. Sciences, University of Idaho, Moscow, Idaho, United States. **remarks:** Isolines and their genotypes of three cultivars (Cv) and one breeding line (B1) differing in leaf morphology. Received October 15, 1987.

- PI 512080 **donor id:** Cv Frogel: AfAf StSt TlTl. **origin:** United States. **other id:** GP-061. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.
- PI 512081 **donor id:** Cv Frogel: afaf StSt TlTl. **origin:** United States. **other id:** GP-062. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.
- PI 512082 **donor id:** Cv Frogel: AfAf stst TlTl. **origin:** United States. **other id:** GP-063. **group:** CSR-PEAS. **remarks:** Isolines useful for study of the effect of foliar modification on physiological, pathological, and agronomic/horticultural traits. Facultative Annual. Genetic Material. Seed.
