Huleh. A tree, native to northern Africa, up to 50 feet high, with many woody branches that form a dense head. The blue, somewhat fleshy drupes are about the size of peas. A resinous gum flows from the bark of the trunk and branches at various times of the year, especially in summer, and hardens to a pale-yellow color. This gum has a pleasant aromatic odor and taste, and thickens in plates covering the branches. The Arabs collect this substance in autumn and winter and chew it to whiten the teeth and sweeten the breath.

For previous introduction see 127867.

141817. No. 307.

141820. Adenocalymna alliaceum (Lam.) Miers. Bignoniaceae.

From Puerto Rico. Seed presented by H. T. Cowles, Professor of Horticulture, College of Agriculture and Mechanic Arts, University of Puerto Rico, Mayaguez. Received May 29, 1941.

An excellent tropical climber, growing to about 40 feet long with 5 to 6 large clusters of lavender flowers each year. Native to tropical South America.

141821 to 141865.

From Brazil. Seeds presented by Dr. Edmundo Navarro de Andrade, Rio Claro, São Paulo.Received May 27, 1941.

A collection of seeds from trees that grew well at Rio Claro.

141822. Eucalyptus alba Reinw.

White Gum. A tall, evergreen tree, with ash-colored, rough, persistent bark and glaucous leaves, varying from ovate-oblong and 3 inches long to ovate-lanceolate and 6 inches long. The small white flowers are in panicles at the ends of the branches, and the top-shaped fruits are ¼ inch in diameter. It is native to New Guinea and Java, and has been successfully established in Brazil, where it is considered of much value.

For previous introduction see 136427.

141823. Eucalyptus angulosa Schauer.

A desert shrub or small tree native to Australia, up to 25 feet high, with lanceolate to ovate-lanceolate, rather obtuse leaves 2 to 4 inches long. Flowers and fruits variable in size, the fruits up to ¾ inch across. For trial in the milder parts of southern California and the Southwest.

141824. Eucalyptus botryoides J. E. Smith.

Bangalay. A tall handsome tree, native to Australia, with beautiful dark-green horizontal lanceolate leaves, umbels of small sessile white flowers, and obovate fruits. In Australia it is used as a windbreak and as a shade tree. The wood is hard, tough, and durable.

For previous introduction see 118380.

141825. Eucalyptus capitellata J. E. Smith.

Stringy Bark. A large tree, native to Australia, with dark-gray, furrowed, fibrous bark and thick, shining, sword-shaped leaves 3 to 6 inches long. The small sessile flowers are in axillary clusters of 5 to 10, and the depressed-globose fruits, nearly half an inch in diameter, have a prominent reflexed rim.

For previous introduction see 93229.
141821 to 141865—Continued

141826. Eucalyptus citriodora Hook.

For previous introduction see 135474.

141827. Eucalyptus gummifera (Gaertn.) Hochr. (E. corymbosa J. E. Smith).

A medium-sized evergreen tree, native to Australia, with leathery, lanceolate leaves and large corymbs of fragrant yellowish-white flowers.

For previous introduction see 132627.

A slender tree of pleasing aspect, growing about 100 feet high, with a trunk commonly straight and even, 2 to 3 feet in diameter. The bark is rough and persistent and the wood reddish. The tree is adapted to a variety of climatic conditions, enduring minimum temperatures of 18° to 20°F., and is said to be content with poor soil. On account of its tough and elastic character and its durability underground, the timber is useful for a great variety of purposes. It is one of the highly valued timber trees of Australia.

For previous introduction see 36619.

141829. Eucalyptus eugenioides Sieber.

A tall tree, native to New South Wales, with fibrous bark, thick oblique leaves 2 to 6 inches long, flowers in axillary clusters of 6 to 12, and ovoid fruits \( \frac{1}{4} \) inch in diameter.

141830. Eucalyptus eximia Schauer.

A large tree, native to New South Wales, with scaly bark, falcate-lanceolate leaves, white flowers, and urn-shaped fruits. The wood is soft and used only for fuel. It is a stately tree and very beautiful when in full bloom.

For previous introduction see 75627.

141831. Eucalyptus exserta F. Muell.

A medium-sized tree with rough, fissured, ash-brown bark, sword-shaped leaves 3 to 6 inches long, axillary clusters of 3 to 8 flowers on long pedicels, and nearly globular fruits \( \frac{1}{2} \) inch in diameter.

For previous introduction see 90694.

141832. Eucalyptus sp.

Introduced under the name of "grandiflora," for which a place of publication has not been found.

141833. Eucalyptus haemastoma J. E. Smith.

A large tree, with a smooth mottled trunk, coriaceous, lanceolate-falcate leaves, small white flowers in axillary clusters of small terminal panicles, and small globular or pear-shaped fruits less than \( \frac{1}{2} \) inch in diameter.

For previous introduction see 132628.

141834 and 141835. × Eucalyptus kirtoniana F. Muell.

For previous introduction see 41623.

141836. Eucalyptus linearis Dehnh.

A graceful shade tree 20 to 50 feet high, with deciduous bark that leaves the tree smooth and white throughout. Native to Tasmania, where the tree is reported to grow in poor, light soils.

141837. Eucalyptus longifolia Link.

For previous introduction see 24408.

141838. Eucalyptus camaldulensis Dehnh. (E. longirostris F. Muell).

A tall Australian tree, up to 200 feet high, with smooth dark-gray bark, narrowly lanceolate leaves 6 inches or more long, stalked umbels of small flowers attractive to bees, and globular fruits with conical tops. The heavy red wood is durable both above and below the ground and is used for railroad ties, piles, and fence posts.

For previous introduction see 77610.
141821 to 141865—Continued

A tall tree with smooth light-colored bark, deciduous in large patches. The timber is useful for tool handles, building, and as a general hardwood. The species is adapted to the coast ranges in Australia and occurs in sandy clay and deep loamy soils.

A small tree with persistent, dark-furrowed bark and sessile, orbicular to ovate-lanceolate, glaucous or white-mealy leaves.

141841. *Eucalyptus melliodora* A. Cunn.
_Honey gum._
_Yellow Box Gum._ A spreading tree up to 150 feet high, with drooping branches, narrow lanceolate leaves 3 to 5 inches long, and small white flowers particularly rich in nectar. The timber is used in Australia by wheelwrights and shipbuilders.

141842. *Eucalyptus microcorys* F. Muell.
A tall tree, with persistent wrinkled bark, thin, broadly lanceolate leaves, and small white flowers. The yellowish timber is especially useful for ballroom floors because of its greasy nature. Native to Australia.

For previous introduction see 123777.

141843. *Eucalyptus* sp.
 Introduced as *Eucalyptus microphylla*, a name of doubtful botanical position.

_Messmate gum._ For previous introduction see 75640.

141845. *Eucalyptus ostusiplora* DC.
A shrub or small tree, with stringy bark and thick, rather broad, shining leaves.

141846. *Eucalyptus*.
_Var. oranensis._ A supposed natural hybrid variety, originating in Algeria, received as *Eucalyptus occidentalis* var. *oranensis*, one of the parents of which is believed to be *E. occidentalis*. It is reported to be a tree of fine appearance, with the flowers and capsules borne on long, slender peduncles and pedicels.

141847. *Eucalyptus paniculata* J. E. Smith.
For previous introduction see 75642.

141848. *Eucalyptus pauciflora* Sieber.
_White-gum._ An Australian tree, 10 feet in height and about 4 feet in diameter. It grows well in swampy lowlands, and the timber is used for general building purposes.

For previous introduction see 124640.

141849. X *Eucalyptus paulistana* Navarro.
A hybrid between *Eucalyptus globulus* and *E. robusta*, the detailed characters of which are not known.

141850. *Eucalyptus pilularis* J. E. Smith.
_Blackbutt._ A slender tree, reported to average 100 to 150 feet high, with a trunk diameter of 3 to 5 feet. The bark of the trunk is dark gray, rough, and partially persistent. It is considered one of the best of all-purpose timbers and is reported to be especially valuable for fence posts and telegraph poles. The honey from the flowers is reported to be of especially good quality. In California the tree grows well near the coast but does not thrive in the dry, hot interior valleys.

141851. *Eucalyptus polyanthemos* Schauer.
_Redbox._ For previous introduction see 38722.

141852. *Eucalyptus propinqua* Deane and Maiden.
A large tree, 120 feet high and 5 feet in diameter, native to New South Wales. The lanceolate leaves are 5 inches long, and the timber is durable either in or out of the ground.

For previous introduction see 75647.
141821 to 141865—Continued

141853. *Eucalyptus punctata* DC. Leatherjacket.

A medium-sized tree of spreading habit, especially when young, attaining in Australia a height of about 100 feet. The species thrives at and near the coast but does not do well in the dry interior. The wood of this tree is tough, hard, close-grained, and very durable. It is useful for fence posts, railway ties, and other purposes.

141854. *Eucalyptus redunca* Schauer.

A shrub or tree which reaches a height of 120 feet in Western Australia where it is native. It furnishes a pale, hard, particularly tough and durable timber, much prized for building purposes, various implements, and other items. The seasoned wood weighs about 70 pounds per cubic foot.

For previous introduction see 75648.

141855. *Eucalyptus regnans* F. Muell.

An Australian tree, up to 325 feet high. The trunk is very straight and whitish, and the narrow leaves, shining on both sides, are of rather thin texture. The wood is well adapted for shingles, planking, and general construction.

For previous introduction see 75649.

A large tree with rough, reddish, fibrous bark persistent to the small branches. The heavy timber is a rich red and is said to be strong and durable; because of the color the tree is also called "red mahogany."

For previous introduction see 38724.

A handsome, symmetrically branched tree of moderate height, with bark of trunk persistent, rough, dark brown, and that of the branches reddish. It would be of value also as a street tree but for the brittle wood and heavy foliage, which cause breaking of the top in heavy winds. It is adapted to a moist atmosphere but also flourishes in a dry one when sufficient water is given, but it does not endure heavy frosts.

For previous introduction see 28682.

A rapid-growing tree attaining a height of 50 to 75 feet. The grayish bark of the trunk is usually rough and persistent but sometimes flakes off. In Australia the tree grows naturally near streams, while in our Southwest, when supplied with water, it has thrived near the coast, on dry mesas, and in the hot valleys of the interior; it has endured minimum temperatures of 15° to 18° F. and maximum temperatures of 110° to 118°.

For previous introduction see 24411.

141859. *Eucalyptus saligna* J. E. Smith.

A tall tree with silvery-gray bark, native to New South Wales. The narrowly lanceolate leaves are 4 to 6 inches long, and the clusters of four to eight white flowers are on short peduncles.

For previous introduction see 75650.

A stocky, erect tree that becomes 30 to 40 feet high, with a trunk 1 foot in diameter, and drooping foliage. It is closely related to *Eucalyptus viminalis*. The timber is hard but, not being straight-grained, is difficult to split. It is used for fence posts and fuel.

For previous introduction see 133137.

For previous introduction see 118382.
141821 to 141865—Continued

141862. × Eucalyptus trabuti Vilm.

A remarkable hybrid between Eucalyptus botryoides Sm. and E. rostrata Schlecht., discovered by L. Trabut. The characters of the leaves are intermediate; the capsules could not well be more nearly intermediate. The great value of this hybrid is in its unusually rapid growth.

For previous introduction see 63581.

A small to moderately large tree, with thick, coarse, fibrous, persistent bark and alternate thick, shining, lanceolate to falcate-lanceolate mature leaves. The timber is inferior. In Australia this tree grows on poor saline flats and ridges in proximity to salt water.

141864. Eucalyptus viminalis Labill.

A graceful Australian tree up to 300 feet high, with rough bark from which exudes the bonelike substance that gives the tree its name of manna gum. The leaves are lanceolate and falcate; the white flowers are in threes and are attractive to bees; and the fruits are flattened globose with sharp-pointed tops. The wood is used only for rough building purposes.

For previous introduction see 77612.

141865. Eucalyptus sp.

Cowpea.

From Nigeria. Seeds presented by the Director of Agriculture, Department of Agriculture, Obadan. Received May 28, 1941.

Yawa.

141867 to 141877.

From Canada. Trees purchased from the Manitoba Hardy Plant Nursery, Dropmore, Manitoba. Received May 21, 1941.

141876 and 141877. Pyrus communis L.

Common pear.

141876. Pioneer.

141877. Tail-Dropmore.

141878 to 141882.

From Manchuria. Seed presented by L. Ptitsin, Harbin. Received June 3, 1941.

141878 and 141879. Prunus armeniaca L. Amygdalaceae.

Apricot.
141878 to 141882—Continued

141878. Cultivated.

141880 and 141881. PRUNUS MANDSHURICA (Maxim.) Koehne.
141880. Cultivated; from Syaolin Station, east of Harbin.
141881. Wild; from Syaolin Station, east of Harbin.

141882. PRUNUS SIBIRICA L.  
Wild; from Lahassusu Station, west of Harbin.

141883 to 141885.

From Brazil. Seed received from the Botanic Garden, Rio de Janeiro, through F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Cienfuegos, Cuba. Received June 4, 1941.

141883. ACACIA sp. Mimosaceae.
 Introduced as Cassia nigra, but the seeds are not of that genus.

141884. CASSIA FASTUOSA Vog. Caesalpiniaeae.

141885. BARIERIA PINNATA (Pers.) Baill. Fabaceae.

141886 and 141887.

From Manchuria. Seed presented by L. Ptitsin, Harbin. Received May 27, 1941.

141886. PRUNUS sp. Amygdalaceae.
  Local mixed varieties.

141887. PRUNUS GLANDULOSA Thunb.  
Flowering almond.

141888. ALBIZZIA ADINOCEPHALA (J. D. Sm.) Britton & Rose. Mimosaceae.
From Cuba. Seed presented by F. G. Walsingham, Atkins Institution of the Arnold Arboretum, Cienfuegos. Received June 7, 1941.

A small unarmed tree, with rather small compound leaves composed of one or two pairs of lanceolate leathery leaflets 1 or 2 inches long, and flower heads in terminal panicles about 4 inches long. Native to Costa Rica.

For previous introduction see 103026.

141889 and 141890. COIX LACRYMA-JOBI var. MA-YUEN (Rom.) Stapf. Poaceae.
From Panama. Seeds presented by Charles L. Luedtke, United States Agricultural Attaché, American Embassy. Received June 13, 1941.

141889. Adlay wheat, No. 2.
141890. Adlay wheat, No. 3.

141891 to 141896.

From England. Seeds presented by C. D. Bell, School of Agriculture, Cambridge. Received June 11, 1941.

141891. PISUM ELATIUS Bieb. Fabaceae.

141892 to 141895. PISUM SATIVUM L. Pea.

141896. PISUM sp.  
A cultivated variety from Tibet.

141897. URGINEA MARITIMA (L.) Baker. Liliaceae.  
Sea-onion.

Red variety.
141898 to 141911. Rhododendron. Ericaceae.

141898. Aphrodite. Flowers rose pink.
141899. Picador. Midseason, of moderate height, rather spreading; flowers brilliant orange red, burns in full sun.
141900. Anchorite. Late, of medium height, rather spreading; flowers 2 inches across, rose with orange undertone.
141901. Greeting. Midseason, of medium height, rather spreading, very floriferous; flowers coral rose, with edges of lobes somewhat wavy.
141902. Revery. Late, of medium height, rather spreading, mucronatum type (indica alba), but flowers very nearly circular in outline, pale rose with no blotches.
141903. Buccaneer. Midseason, of medium height, rather spreading; flowers brilliant red, but with darker blotch than Tanager; burns in full sun.
141904. Pilgrim.
141905. Joya. Late, of medium height, with mucronatum habit; flowers brilliant rose pink, large.
141906. Trilby.
141907. Tanager. Late; flowers large, fuchsia pink with darker spots.
141908. Glamour. Late, of medium height, rather spreading; flowers very brilliant rose red.
141909. Remembrance.
141910. Gaiety. Late, of medium height, rather spreading; flowers bright clear pink with a rather heavy blotch of deep rose red.

141911. Opera.

From Australia. Seed presented by A. T. Pugsley, Assistant Plant Geneticist, University of Adelaide, Waite Agricultural Research Institute, Adelaide, South Australia. Received June 23, 1941.

Nabawa × Hope.

141913. Allium sp. Liliaceae. Onion.

From Brazil. Bulbs presented by Erwin P. Keeler, Agricultural Attaché, American Embassy, Rio de Janeiro. Received June 23, 1941.

141914 and 141915.

141914. Habranthus robustus Herb. (Zephyranthes robusta (Herb.) Baker).

A variety with white flowers, flushed with pale amaranth pink (Ridgway), up to 3 3/4 inches across. The leaves are 18 inches long and 1/2 inch broad.

A zephyrlily, with leaves a foot or more long and about a quarter of an inch wide, and a scape with flower reaching a height of 11 inches. The flower, measuring 2 1/4 inches across, is clear white, with the tips of the outer perianth segments touched with cream on the outer, or lower, surface. It closely resembles Zephyranthes carinata.

141916 to 141975.

From Manchuria. Bulbs and seeds presented by L. Ptitsin, Harbin. Received June 18, 1941.

Unless otherwise mentioned, the material was introduced as seeds.
