Plant Inventory No. 196 is divided into two parts that encompass PI's 506219 - 514275 for calendar year 1987. Questions about data organization and proper plant identification should be directed to the author. This is not a listing of plant material for distribution.

Thanks are expressed to the following persons associated with the Plant Introduction Office for their contribution to Plant Inventory No. 196: L.G. Garner and R.A. Norris for continued excellence in handling all aspects of the computer system operation. Assistance by members of the Germplasm Resources Information Network (GRIN) with software and hardware problems is appreciated.

This inventory with a new frontpiece is the first to be generated for a full year through the GRIN system.
